## **Information to our readers**

The latest data depicted in this publication have been collected from various source agencies. CBHI relies on these source agencies to compile the data for National Health Profile namely (a) Central Ministries/ Departments (b) Health Authorities of all States/UTs (c) Autonomous Organizations & other Agencies, and have been indicated at the bottom of each table. We make every effort for quality of data however, the source agencies are solely responsible for the accuracy or otherwise of data depicted in the publication. In case of doubt, source agency may kindly be contacted. The non-reporting / under coverage of data, column of information for different reference periods and number of reporting institutions etc. have been explicitly mentioned /shown in the tables.

### M E S S A G E

Health is the cornerstone of human potential and prosperity. It is a shared aspiration that transcends political boundaries, socioeconomic disparities, and cultural diversity. As the custodians of public health, we are entrusted with safeguarding the precious resource that is the health of our citizens.

The National Health Profile-2023 represents a comprehensive and meticulously curated resource, a repository of vital information that will guide our journey toward a healthier and more resilient society. Within its pages, you will find a wealth of data, insights, and analyses that provide a clear picture of our current health landscape, its challenges, and its opportunities.

This profile reflects not only where we stand today but also the path we must chart for a healthier tomorrow. It underscores the critical importance of evidence-based policymaking, informed decision-making, and collaboration across sectors and stakeholders. Our health challenges are multifaceted, and so too must be our solutions.

I would like to express my gratitude to the dedicated professionals, researchers, healthcare workers, all those who contributed to the creation of this National Health Profile and specially the entire team of CBHI for their untiring efforts in compiling such a huge data base. Your tireless efforts are the foundation upon which we build a healthier future.

I urge you to use this National Health Profile as a source of inspiration, a reference guide, and a tool for advocacy. Let it inform your work, guide your decisions, and galvanize your commitment to public health.

### FOREWORD

The Central Bureau of Health Intelligence (CBHI) has been releasing the "National Health Profile (NHP)" as an annual publication since 2005. Voluminous data has been collected from Directorates of Health & Family Welfare of all States/UTs, Central Government Organizations, National Health Programmes and various other concerned National agencies in India for this, the eighteenth edition.

This publication is of national importance as it features namely Health Information under six themes viz. Demography, Socioeconomic Status, Health, Health Finance, Health Infrastructure and Human Resources. This information is useful for efficient functioning of any public health system.

Expectedly, this document endeavors to support all concerned government departments & institutions, public sector enterprises, non-government organizations, policy makers, planners, administrators, managers, researchers and academicians for a strong and efficient health care system.

I Congratulate CBHI for bringing out this edition of 'National Health Profile' and advise them to synchronize their efforts with other agencies that collect data such as NHA, IDSP and clinical Establishment Act.

## MESSAGE

Authentic, systematic and timely data of health sector is the foundation for evidence based decision making in health system. In order to achieve this objective, Central Bureau of Health Intelligence collects data from the health and other relevant sectors to support planning, management, and decision making for policy development & implementation, governance & regulation and health research.

The data revolution in health sector is need of the hour and it will continue to shape and improve overall patient care. The updated information, contained in this publication, on Demographic, Socio - Economic, Health Status, Health Financing, Human Resources for Health and Health Infrastructure in India has made "National Health Profile" much topical and comprehensive.

I would like to express my gratitude to all the agencies of States and Union Territories, Office of Registrar General of India, National Health programme divisions, National Medical Council, Nursing / Dental / Pharmacy Councils of India and different Ministries of GoI in providing updated information for this publication. The valuable support from all the staff of CBHI Head Quarter and of each Field Survey Units in data compilation and preparation of analytical write up of publication need special mention.

I hope the National Health Profile - 2023 publication will meet the expectation of our readers. In the era of digitization of the Healthcare industry the information would work as stimulant. The feedback and valuable suggestions from various users had been very encouraging, in the past, and we look forward for such continued support, in future.

## EXECUTIVE SUMMARY

From time immemorial man-kind has been interested in trying to control the disease. Indeed, a profound truth resonates in the echoes of history, for medicine itself found its genesis in the embrace of sympathy and emerged as an imperative response to the inexorable demands of necessity and it can be proclaimed with certainty that the first healer was none other than the very first man, and the mantle of compassion extended to the realm of care was donned by the first woman, a trailblazing nurse.

Health is regarded as the indispensable basis for defining a person's sense of well-being. Health care is not merely medical care, is aligned with cultural understanding of ill health and well-being, extent of socio-economic disparities, reach of health services and quality and costs of care along with current bio-medical understanding about health and illness.

Our country began with a glorious tradition of public health, as seen in the references to the descriptions of the Indus valley civilization which mention "Arogya" as reflecting "holistic well-being."

The Constitution of the World Health Organization, which came into force on April 7, 1948, defined health "as a state of complete physical, mental and social well-being, not merely the absence of disease and infirmity". Though this definition provides holistic view of health, however the notion of complete absence of disease is unimaginable.

The connotation of health based on the internal and external equilibrium - leads to another dimension of the promotion of health as an effort to remove diseases, diminish risk factors that might lead to disease and the numbers of individuals who suffer from them. It would have to involve the individuals whose health is to be promoted in an active way, and participation of communities to ensure and undertake whatever is necessary to enhance health and participating in preventive action. In the words of C. Everett Koop, "Health care is vital to all of us some of the time, but public health is vital to all of us, all of the time." This powerful insight reinforces the significance of public health as an ever-present force, safeguarding well-being throughout every moment of lives.

In 2015, total 195 nations agreed with the United Nation that they can change the world for the better and improve the lives of the people in their country by the year 2030. WHO is committed to achieve the Goal 3: Good health and well-being under Sustainable Development Goals (SDGs); target 3.8: "Achieve universal health coverage, including financial risk protection, access to quality essential health-care services and access to safe, effective, quality and affordable essential medicines and vaccines for all".

With the progression of new millennium, the concept of health has changed and while a few years back it was seen as an entity which was to be achieved with the advancement of healthcare technology, along with the Universal Coverage of Health, it is now believed to be an achievement which is possible only when the human beings are in attune with their physical and mental environment. This new concept of "One Health" is an approach calling for the collaborative efforts of multiple disciplines working locally, nationally, globally to attain optimal health for people, animals and our environment. The Government of India has made concerted and sustained effort in putting action policies and programmes that resonate with the targets set in SDGs.

Under the National Health Mission, the Government of India has made concerted efforts to engage all relevant sectors and stakeholders to march in the direction of achieving universal health coverage and delivering quality health care services to all at affordable cost by launching Ayushman Bharat – Pradhan Mantri Jan Arogya Yojna (AB-PMJAY), a flagship scheme to make health care facilities available and accessible to the economically weaker segment of the population.

Today, the Indian health care network is among the largest in the world as it reaches out to every mother and child in the country through a continuum of care approach across all life stages. In India, the rising economic growth with enhanced fiscal capacity of the government, the changing health needs of the population and the growing incidences of surpassing expenditure due to calamitous health emergencies have necessitated a policy and programme response to reach everyone in a comprehensive integrated way.

We are entering into a new era in global health. The country is witnessing the process of rapid health transition, which not only includes demographic and epidemiological transition but nutritional and socio-cultural transitions as well.

Health management requires the consistent monitoring of the health status of the population, the provision of services as to the coverage and utility, drugs stocks and consumption patterns, equipment status and availability, Finances, personnel etc. on a regular basis. Further, the demand for health statistics has increased, especially in the context of growing interest on evidence-based planning in health programme as well as promoting the values of transparency and accountability as essential requirements of democratic governance at various levels in India as well as globally. This requires timely and accurate information from various sources.

The main sources of health information are the central and state agencies. The direct sources encompass the sample surveys and official statistics, which are generally based on built-in information collected for any official programme. The indirect sources constitute Census, Civil Registration System (CRS) and Sample Registration System (SRS).

The CBHI weaves a comprehensive tapestry of data encompassing diverse facets and determinants of health, ranging from the very essence of our citizens' well-being to the intricacies of health resources and the utilization of healthcare facilities. This resplendent fountain of information serves as a beacon, illuminating the path for agencies, organizations, technical experts, and decision-makers alike, empowering them with essential strategic insights.

### **National Health Profile**

National Health Profile (NHP) provides an overview of health status and health care delivery system in a country, revealing nation's health care landscape on 6 thematic areas. Indicators provide critical information on performance and achievement, which is the cornerstone of effective management of any health programme.

National Health Profile – 2023 comprises all of the systemic updates under six chapters.

### **Chapter One - Demographic Indicators**

Demography is a scientific study of human population. It is important to understand the structure of a population in order to plan public health interventions, as the health of communities and individuals depend upon the dynamic relationships between the number of people, the space they occupy and skills they have acquired.

Demographic indicators reveal population size, composition, geographic distribution and growth in given geographical distribution. It also reveal its relationship with social, economic and behavioural factors.

- Data Sources**

- ✓ Population census- Main source of demographic data which is conducted at a decadal interval.
- ✓ vital events registration (Birth, death and marriages)
- ✓ Population surveys, population projections and Sample Registration System (SRS) are other sources of demographic data.

- **Key Aspects**

- ✓ Expected population increase from 121.1 crores to 152.2 crores during the period 2011-2036, an increase of 25 percent in twenty-five years at the rate of 1.0 percent annually.
- ✓ Sex ratio of the total population (females per 1000 males) is expected to increase from 943 in 2011 to 952 during 2036.
- ✓ The proportion of population in the working age-group 15-59 years is expected to rise from 60.7 percent in 2011 to 64.9 percent in 2036.
- ✓ The median age of Indians is expected to be of 34.5 years in 2036 as compared to 24.9 years in 2011.
- ✓ The SRS abridged tables 2016-20 which gives the Life Expectancy of Life at Birth shows that it has increased from 62.3 years in 1997-01 to 70.0 years in 2016-20.
- ✓ IMR for the country has come down to 28 in 2020 from 50 in 2009.

➤ **Chapter Two - Socio-Economic Indicators**

Socio economic development leads to changes in economic and social dimensions by incorporating public concerns in development of policies for society and economic initiatives.

The chapter on socio-economic status elaborates multi-factorial “conditions” like environmental, material, and personal characteristics that interact elaborately. In this context, the chapter provides with the latest data of the socio-economic indicators, according to State and Union Territory, as these factors influence health/nutrition outcomes through complex pathways of change. The socio-economic factors included in this chapter are “literacy & school enrolment”; “age at effective marriage”; “economic factors”; “per capita availability of cereals & pulses”; “employment rates,”; and household amenities.

- **Data Source The socio-economic factors included in this chapter are**

- ✓ Literacy & school enrolment
- ✓ Age at effective marriage
- ✓ Economic factors
- ✓ Per capita availability of cereals & pulses
- ✓ Employment rates
- ✓ Household amenities.

- **Key highlights**

- ✓ the gross enrolment ratio for both girls and boys in schools in India in primary grades in 2021-22 was 104.8 and 102.1, respectively. However, by the time students reach higher secondary grades, the enrolment ratio drops to 58.0% and 57.0%, respectively.
- ✓ At the national level, the mean age at effective marriage of females remained almost constant at around 22 years from 2018 to 2020.
- ✓ In 2022-23, Telangana and Karnataka have the highest Per Capita Net Domestic Product. Further among the populous states, Per Capita Net Domestic Product was above INR 150,000 in Andhra Pradesh, Odisha, Punjab, Haryana, Karnataka, Rajasthan, Tamil Nadu, Uttarakhand and Telangana.

➤ **Chapter Three -Health Status Indicators**

Health status indicators presents burden of Communicable, HIV/AIDS and Non communicable diseases (morbidity) and deaths associated to these morbidities (case fatality) - according to different States and Union Territories, and India as whole. Strong longitudinal surveillance system is an integral part

and a pre-requisite for any morbidity control programme, in a geographic area. Using surveillance data from a cross-section of populations (mainly public health facilities) in India, this chapter also provides trends and status of maternal and child health situation in India and in its States and Union Territories.

- **Data Source**

- ✓ maternal & child health indicators are presented for multiple recent years. This chapter also provides,
- ✓ cases and deaths due to other communicable diseases like Cholera, Acute Diarrhoeal Morbidity, Enteric Fever(Typhoid), Acute Respiratory Infection, Tetanus Neonatal, Tetanus Other than Neonatal, Diphtheria, Whooping Cough, Measles, Viral Hepatitis (All Causes), Rabies, Pneumonia (All Causes), Meningococcal Meningitis, Syphilis, Gonococcal Infection in India and its States/UTs in 2020 and 2021 by gender, using data from monthly health condition reports from Directorate of Health Services of the State/UT.

- **Key highlights**

- ✓ In 2021, total patients notified for TB was 2,143,867. Out of the total microbiologically confirmed cases (1,137,328 in 2021) of TB, 82.10% of the patients were successfully treated. (Table No. 3.1.24)
- ✓ With state-wise fluctuations, India has made significant progress in tackling HIV epidemic, from a prevalence of 0.40% in 2010-11 to 0.22% by 2020-21 (Table No. 3.1.25)
- ✓ In 2022, out of 9.91 crore people screened under National Programme for Prevention & Control of Non-Communicable Diseases (NP-NCD): around 75 lakhs were diagnosed with hypertension, 61 lakhs with diabetes, 29 lakhs with Hypertension and Diabetes, 2 lakhs with CVDs, 1 lakh with stroke and 3 lakhs with common cancers.

➤ **Chapter Four - Health Finance Indicators**

Healthcare financing is the core function of health systems that enables progress towards Universal Health Coverage (UHC) for improving effective service coverage and financial protection. Health finance indicators provides with detailed information on Public Expenditure on Health and Medical Expenditure. Appropriate Health Financing is a means to ensure adequate funds for health care, provide equitable access to all population groups and reduce barriers to utilize health services.

- **Key highlights**

- ✓ Total Public expenditure on health (estimated) for the year 2023-24 is Rs. 95719 crore including Health (Rs. 38828 crores and NACO 2,917 Rs. crore), NHM (47,347 crore), AYUSH (3648 crore) and Department of Health Research (2,980 crore) (Table 4.2.1)
- ✓ The per capita expenditure on CGHS has increased from Rs. 4,050 to Rs 15260 during the period from 2010-11 to 2022-23. (Table 4.3)
- ✓ The per capita expenditure on ESIS has increased from Rs. 254 to Rs 908 from 2009 to 2022. As of 31st March 2022, around 12.04 crores of beneficiaries were covered under ESIS(Table 4.5)

➤ **Chapter Five-Human Resources for Health (HRH)**

Human resource for health focuses on planning, development, performance, management, retention, information, and research on human resources for the health care sector. In recent years, increased awareness of the critical role of HRH in strengthening health system performance and improving population health outcomes has placed the health workforce high on the health agenda. India's mandate for Universal Health depends to a great extent on adequate and effective HRH providing primary, secondary and tertiary level of care in both private and public sectors. The size and composition of HRH in India has significantly changed during the last decade. The recent health sector reforms in India, particularly since the launch of the National Rural Health Mission, have laid emphasis on strengthening HRH in the public sector system.

- **Key highlights**
  - ✓ With regard to the number of registered doctors, among the states, Maharashtra (2,11,046 doctors) has the highest number of registered doctors followed by Tamil Nadu (1,49,397 doctors), Karnataka (1,34,448), and Andhra Pradesh (1,05,804).
- **Chapter Six - Health Infrastructure**

Health infrastructure is an important indicator for understanding the health care delivery provisions and welfare mechanisms in a country. Infrastructure has been described as the basic support for the delivery of public health activities. Public health infrastructure has been referred to as 'the nerve centre of the public health system'.
- **Data Source**

The chapter on health Infrastructure details out the indicators that are subdivided into three categories

  - ✓ Educational infrastructure
  - ✓ Service infrastructure
- **Key highlights**
  - ✓ Medical education infrastructures have shown rapid growth over past few years with 679 medical colleges (380 Government, 299 Private), and 1,04,163 MBBS seats as on 30.06.2023 (Table 6.1.1(c))
  - ✓ Currently there are 10137 Institutions for ANM with 50,388 seats for admission, and 43,735 institutions with 3,20,928 Nursing seats in the country (Table 6.1.6)
  - ✓ As on 31st March 2021, there are total of 1,61,829 Sub Centres (SCs) (1,57,935 rural + 3894 urban), 31,053 Primary Health Centres (PHCs) (24,935 rural + 6,118 urban) 6,064 Community Health Centres (CHCs) (5,480 rural + 584 urban) 1,275 Sub-divisional Hospitals, 767 District Hospitals. (Table 6.2.1 & 6.2.2)

1.3.2 (b)	Number of Deaths Registered by Sex and States/UTs (Rural/Urban), 2020	53
1.3.2 (c)	Number of Infant Deaths Registered by Sex and Residence, 2020	54
1.3.2 (d)	Number of Still Births Registered by Sex and Residence, 2020	55
1.3.3	Growth in Medical Certification as a part of total registered deaths(1995-2020)	56

## **Demographic Indicators**

### **Highlights**

Demographic indicators reveal population size, composition, geographic distribution and growth in a given geographical distribution. It also reveals their relationship with social, economic and behavioral factors. Population size refers to quantity of population and can be enumerated by census. The composition deals with quality aspect of population like age, sex, literacy level, occupation, income, marital status, language spoken, and religion. Population growth reveals growth of population over a decade and depends upon fertility, mortality pattern and migration of population. Distribution gives geographical distribution of population in a given country or given area. Demographic Indicators can be divided into two parts: Population Statistics and Vital Statistics. Population Statistics shows trend of population size and growth, sex ratio and population density while Vital Statistics trends of birth rate, death rate, life expectancy at birth, natural growth rate and mortality and fertility rates.

State/UT wise performance of these indicators helps us to identify areas that need policy and programme interventions, setting near and far-term goals, and deciding priorities, besides understanding them in an integrated structure.

### **Population Statistics**

- As per census 2011, India's population stood at 12108.5 lakhs (6232.7 lakhs males and 5875.8 lakhs females). Out of the census till date, only for the decade 1911-21, the Average Annual Exponential Growth Rate was negative. (Table No. 1.1.1 (a))
- The Population of India is expected to increase from 121.1 crores to 152.2 crores during the period 2011-2036, an increase of 25% in twenty-five years at the rate of 1.0 percent annually. As a consequence, the density of population is expected to increase from 368 to 463 persons per square kilometer. (1.1.2 (a))
- The sex ratio (females per 1000 males) in the country has further improved from 933 in 2001 to 943 in 2011. (Table No. 1.1.2 (a)).
- The sex ratio of total population is expected to increase from 943 in 2011 to 952 during 2036. (Table No. 1.1.2 (a))
- The Projected sex Ratio at Birth is expected to increase from 906 in 2011 to 909 in 2031. (Table No. 1.1.2 (c))
- The proportion of population in the working age-group 15-59 years is expected to rise from 60.7 percent in 2011 to 64.9 percent in 2036. (Table No. 1.1.3 (d))
- In 2011, total 50.2 percent of the population in the country, was aged 24 years and below, constituting 30.9 percent and 19.3 percent in the ages 0-14 years and 15-24 years respectively. The combined proportion of these two age-groups is expected to fall from 50.2 percent in 2011 to 35.3 percent in 2036. The average age of Indians is expected to be 34.4 years in 2036 as compared to 24.9 years in 2011. (Table No. 1.1.3 (d) & 1.1.5)

### **Vital Statistics**

- The crude birth rate is expected to decline from 20.1 during 2011-15 to 13.1 during 2031-35 because of falling level of total fertility. In contrast, the crude death rate is expected to increase marginally due to changing age structure of the population with the rising median age as a result of continuing decline in fertility and increase in the expectation of life at birth. It will increase from 7.2 during 2011-15 to 7.3 during 2031-35. (Table No. 1.2.3)

- The SRS abridged tables 2016-20 shows that Life Expectancy at Birth has increased from 62.3 years in 1997-2001 to 70 years in 2016-20. For 2016-20, the Life Expectancy for Females is 71.4 years and 68.6 years for Males. (Table No. 1.2.5 (a))
- IMR for the country has declined to 28 in 2020 from 50 in 2009. (Table No. 1.2.6)
- Total Fertility Rate (TFR) for the country is 2.0 in 2020. During 2020, Bihar has reported the highest TFR (3.0) while Delhi & Tamil Nadu have reported the lowest TFR (1.4). (Table No. 1.2.11(a))

## 1.1: Population Statistics

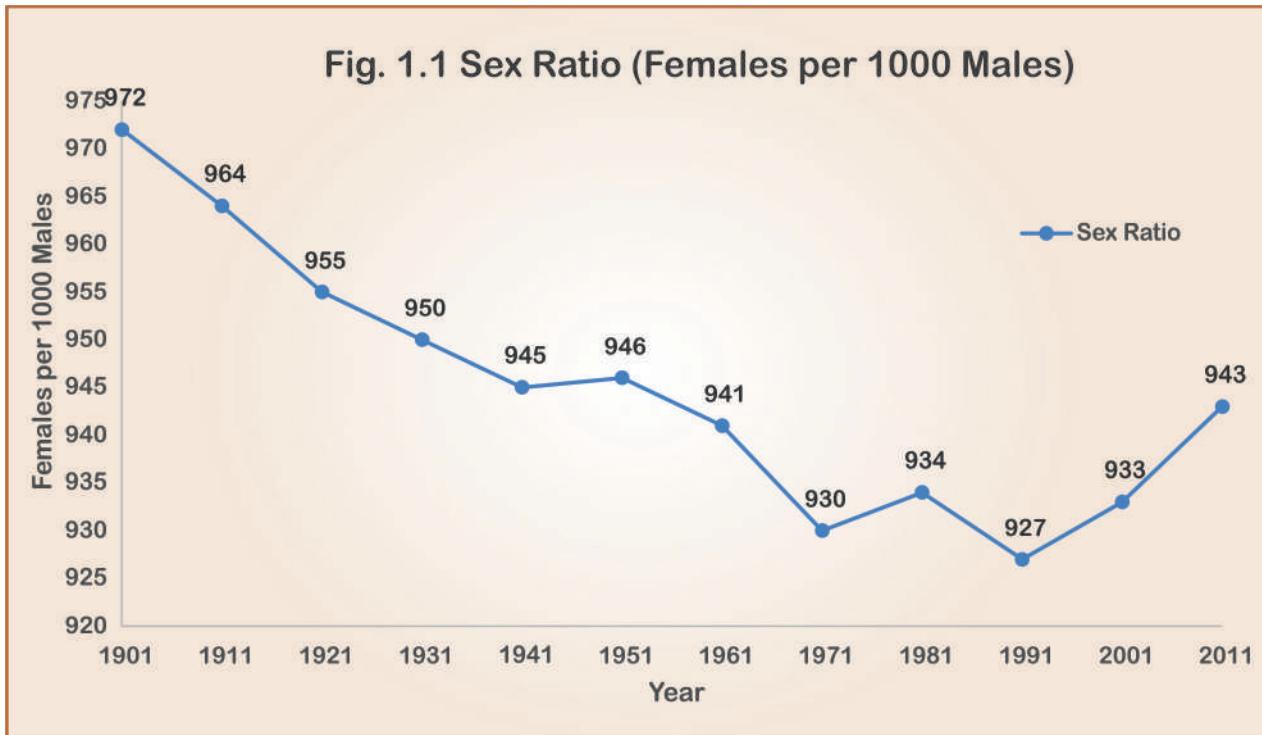

### 1.1.1 (a): Trend in Census Population in India 1901 – 2011

S. No.	Year	Total Population (In Lakhs)			Sex Ratio	Population Density <sup>h</sup>	Decadal Growth Rate (%) <sup>g</sup>	Average Annual Exponential Growth Rate	% of Urban Population to Total Population
		Male	Female	Total					
1	1901	1207.9 <sup>b</sup>	1173.6	2384.0 <sup>a</sup>	972 <sup>f</sup>	77	NA	NA	10.85
2	1911	1283.9	1237.1	2520.9	964	82	5.75	0.56	10.29
3	1921	1285.5	1227.7	2513.2	955	81	-0.31	-0.03	11.18
4	1931	1429.3	1357.9	2789.8 <sup>a</sup>	950 <sup>f</sup>	90	11	1.04	11.99
5	1941	1636.9	1546.9	3186.6 <sup>a</sup>	945 <sup>f</sup>	103	14.22	1.33	13.86
6	1951 <sup>g</sup>	1855.3	1755.6	3610.9	946	117	13.31	1.25	17.29
7	1961 <sup>g</sup>	2262.9	2129.4	4392.3	941	142	21.64	1.96	17.97
8	1971	2840.5	2641.1	5481.6	930	177	24.8	2.2	19.91
9	1981 <sup>c</sup>	3533.7	3299.5	6833.3	934	216	24.66	2.22	23.33
10	1991 <sup>d</sup>	4393.6	4070.6	8464.2	927	267	23.87	2.16	25.7
11	2001 <sup>e</sup>	5322.2	4965.1	10287.4	933	325	21.54	1.97	27.81
12	2011 <sup>i</sup>	6232.7	5875.8	12108.5	943	382	17.7	1.64	31.14

Source: Office of the Registrar General & Census Commissioner, India

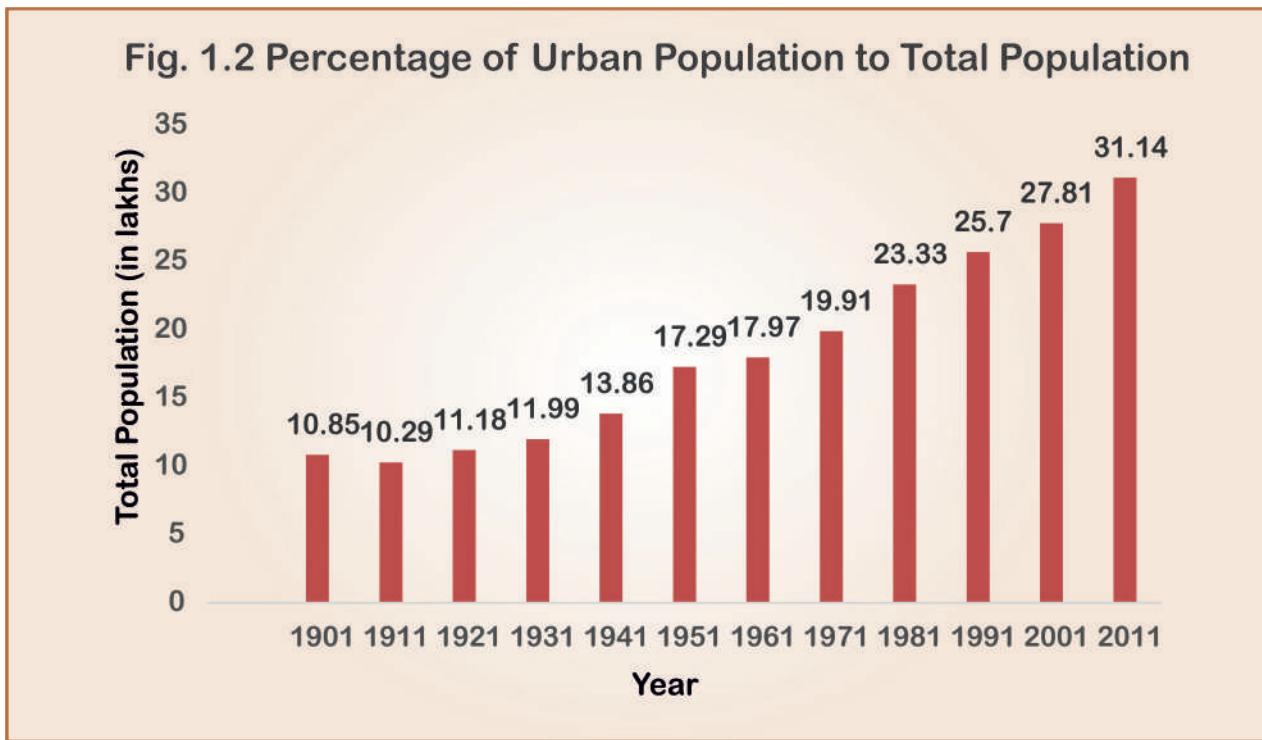

- a. The distribution of population by sex of Puducherry for 1901 (2,46,354), 1931 (2,58,628) & 1941 (2,85,011) is not available. The figures of these years are therefore, exclusive of these population figures so far as distribution by sex is concerned.
- b. Sex wise Distribution of Chandan Nagar (26831) of West Bengal and Gonda (18810) of Uttar Pradesh are not available.
- c. Includes interpolated population of Assam where the 1981 census could not be conducted owing to disturbed conditions prevailing in that state during that period.
- d. Includes Interpolated population of Jammu & Kashmir based on final population of 2001 census, where the 1991 census could not be held.
- e. India figures for 2001 includes estimated population of the three sub - divisions Viz. Mao Maram, Paomata and Purul of Senapati district of Manipur.
- f. Excludes Puducherry.
- g. In working out 'decadal growth' and 'percentage decadal growth' for India 1941 - 51 and 1951 - 61 the population of Tuensang district for 1951 (7,025) and the population of Tuensang (83,501) and Mon (5,774) districts for 1961 census of Nagaland state have not been taken into account as the areas were censused for the first time in 1951 Census and the same are not comparable.
- h. For calculating density, the area figure for India exclude 78,114 sq. Km. under illegal occupation of Pakistan and 5180 sq. Km. illegally handed over by Pakistan to China and 37555 sq. Km. under illegal occupation of China in Ladakh district and 1573 sq. Km. of three sub - division of Senapati district of Manipur.
- i. The data pertaining to three sub-divisions Viz. Mao Maram, Paomata and Purul of Senapati district of Manipur were finalized after release of PCA of Census 2011 and accordingly the figures for India has been revised.

The sex ratio of India during 1901 was 972 females per thousand males. Since then, it has continued to decline decade after decade to 927 females against 1000 males in 1991(Except in 1981).The sex ratio has further improved from 933 in 1991 to 943 in 2011 in the country table no. 1.1.1(a).

Source: Table 1.1.1 (a)

An important trend is urbanization of India with 31.14 % of the Indian population living in Urban areas in 2011 as compared to 10.85 % in 1901. {Table 1.1.1 (a)}

Source: Table 1.1.1 (a)

**1.1.1 (b): State/UT wise Distribution of Population, Sex Ratio, Density and Decadal Growth rate of Population: 2011**

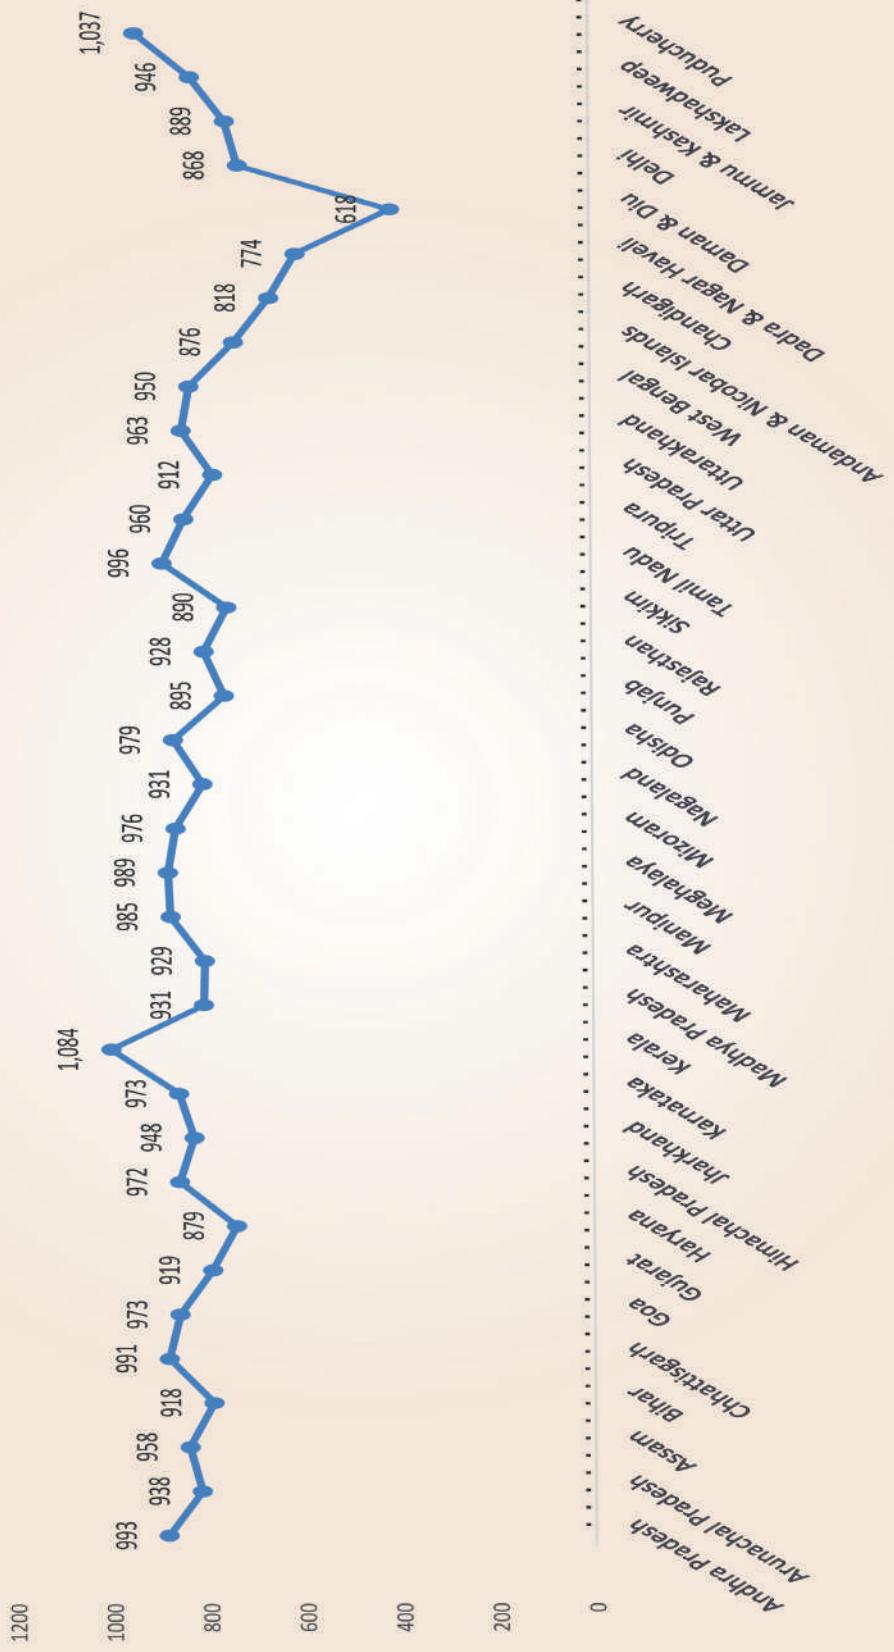

S.No.	State/UT	Total Population (in lakhs)			Sex ratio	Population Density	Decadal growth rate

Source: Office of the Registrar General & Census Commissioner, India

1. The data pertaining to three sub-divisions Viz. Mao Maram, Paomata and Purul of Senapati district of Manipur were finalized after release of PCA of Census 2011 and accordingly the figures for India and State of Manipur have been revised.
2. For working out density of India and the State of Jammu & Kashmir, the entire area and population of those portions of Jammu & Kashmir which are under illegal occupation of Pakistan and China have not been taken into account.
3. For Census 2011, the population of "Others" has been clubbed with the "Males" for working out population, 0-6 population, literates and relates rates and ratios.
4. In working out 'decadal variation' and percentage decadal variation' for 1941-1951 & 1951-1961 of India and Nagaland State, the population of Tuensang District for 1951(7,025) & the population of Tuensang (83,501) & Mon (50,774) districts for 1961 Census have not been taken into account as the area was censused for the first time in 1951 and the same are not comparable.
5. The 1981 Census could not be held owing to disturbed conditions prevailing in Assam. Hence the population figures for 1981 of Assam have been worked out by 'Interpolation'.
6. The 1991 Census was not held in Jammu & Kashmir. Hence the population figures for 1991 of Jammu & Kashmir have been worked out by 'Interpolation'.
7. The distribution of population of Pondicherry (Puducherry) by sex for 1901 (246,354), and 1931 (258,628) and 1941 (285,011) is not available. The figures of India for these years are, therefore, exclusive of these population figures so far as distribution by sex is concerned.
8. Arunachal Pradesh was censused for the first time in 1961.
9. In 1951, Tuensang was censused for the first time in 129.5 sq.kms of areas only. In 1961 censused areas of Tuensang District of Nagaland was increased to 5356.1 sq.kms.
10. Due to non-availability of census data the figures for the decades, from 1901 to 1951 have been estimated for the districts of Kohima, Phek, Wokha, Zunheboto and Mokokchung of Nagaland. Estimation however could not be done for Tuensang and Mon as they were not fully censused prior to 1961.
11. As the sex break-up for the districts Sheopur, Morena, Bhind, Gwalior, Datia, Shivpuri, Guna, Ratlam, Ujjain, Shajapur, Dewas, Jhabua, Dhar, Indore, West Nimar (Khargone), Barwani, Raigarh, Bhopal, Sehore and Raisen is not available for the year 1901. Figures for males and females have been estimated for the year 1901 for Madhya Pradesh.
12. One village Ramtapur (code No. 217 and 101 in 1951 and 1961 respectively) of Jukkal circle of Degulurtaluka which was transferred under the state Reorganisation Act, 1956 from Maharashtra to Andhra Pradesh, till continues in Nanded district of Maharashtra. The population of this village has, however, been adjusted in Nizamabad district for the year 1901-1951.
13. The names of Uttaranchal and Pondicherry have changed to Uttarakhand and Puducherry respectively after Census 2011.
14. The Jammu and Kashmir Reorganisation Act, 2019 reconstituted the Indian-administered state of Jammu and Kashmir into two Indian-administered union territories (UTs) called Jammu and Kashmir, and Ladakh, and becoming effective on 31 October 2019.

Source: Report of the Technical group of Population Projection July 2020 (2011-2036), Ministry of Health & Family Welfare

Note: CBR- Crude Birth Rate & CDR- Crude Death Rate

Fig. 1.17 Year-wise Projected Crude Birth Rate vs Crude Death Rate

Source : Table 1.2.3

The crude birth rate will decline from 20.1 during 2011-15 to 13.1 during 2031-35 because of falling level of total fertility. In contrast, the crude death rate is expected to increase marginally due to changing age structure of the population with the rising median age as a result of continuing decline in fertility and increase in the expectation of life at birth. It will increase from 7.2 during 2011-15 to 7.3 during 2031-35. [Table: 1.2.3]

**Source:** Sample Registration System (SRS)-Bulletin September 2018, 2019 & 2020, Office of the Registrar General & Census Commissioner, India  
**Notes:**

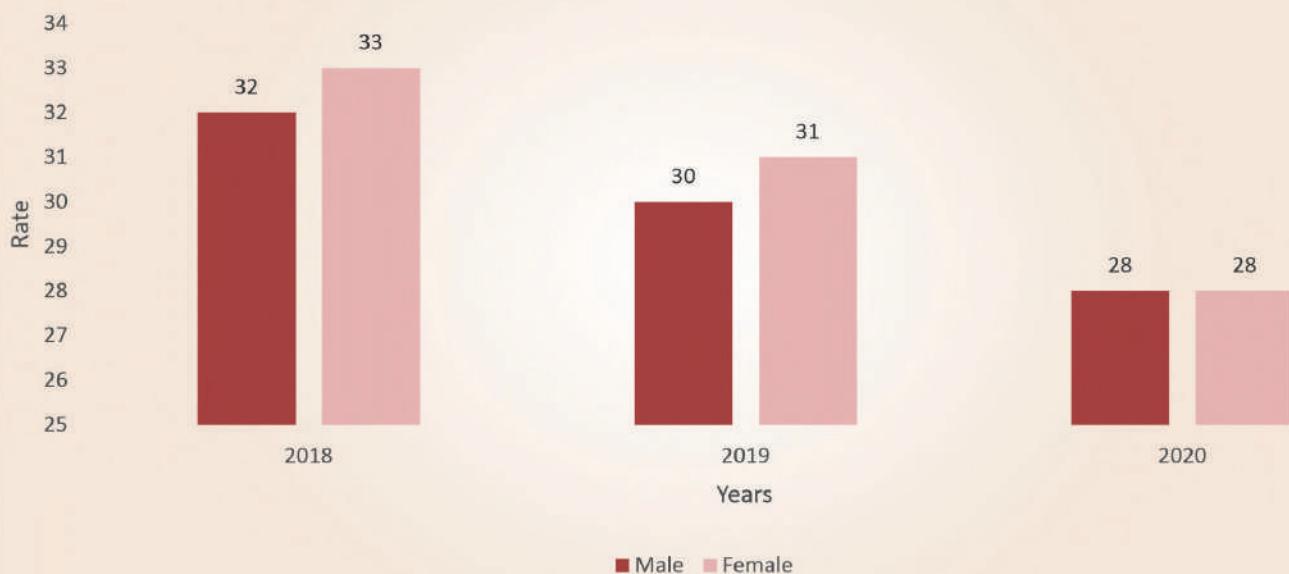

1. Per 1000 live births
2. Infant Mortality rates for smaller States and UTs are based on three years period 2017-2019. On account of wide year to year fluctuations due to inadequate sample size, the infant mortality rate by sex, separately for rural and urban areas is not given.

# **CHAPTER TWO**

# **SOCIO-ECONOMIC INDICATORS**

**An overview of Social-Economic  
Characteristics like Education  
Gender, Poverty and Employment**

## 2. Socio Economic Indicators

Table No.	Table Name	Page No.
<b>2.1</b>	<b>Education</b>	
2.1.1	State / UT wise Literacy Rate in India, Census 2011	62-63
2.1.2	State/UTs wise Gross Enrolment Ratio (GER) by Gender and level of School Education, 2021-22	64-65
<b>2.2</b>	<b>Social Indicators</b>	
2.2.1 (a)	Mean Age at Effective Marriage of Females in India and Bigger States/UTs, 2018- 20	66
2.2.1 (b)	Mean Age at Effective Marriage of Females in Rural Areas of India and Bigger States/UTs 2018-20	67
2.2.1 (c)	Mean Age at Effective Marriage of Females in Urban Areas of India and Bigger States/UTs 2018-20	68
<b>2.3</b>	<b>Economic Indicators</b>	
2.3.1	State/UT wise Per Capita Net State Domestic Product at Current Prices with Base year 2011-12 as on 15.03.2023	69
2.3.2	Gross National Income, Gross Domestic Product, Net National Income, Per Capita Income in India from 2011-12 to 2022-23	70
2.3.3	Per Capita per Day Net Availability of Cereals and Pulses in India 2001- 2022(P)	71
<b>2.4</b>	<b>Employment Exchange</b>	
2.4.1	State/UT wise Employment Exchange Statistics for the year 2022	72
<b>2.5</b>	<b>Housing and Amenities</b>	
2.5.1	State/UT wise Distribution of Households by Predominant Material of Roof in India, Census 2011	73
2.5.2	State/UT wise Distribution of Households Having Safe Drinking Water Facilities in India, Census 2011	74-76
2.5.3	State/UT wise FHTC Coverage of Habitations under Jal Jeevan Mission (JJM) as on 31.03.2023	77
2.5.4 (a)	District wise status of habitations affected with Fluoride contamination beyond permissible limit in drinking water sources (As on 01.04.2023)	78-79

<b>Table No.</b>	<b>Table Name</b>	<b>Page No.</b>
2.5.4 (b)	District wise status of habitations affected with Arsenic contamination beyond permissible limit in drinking water sources (As on 01.04.2023)	80
2.5.4(c)	Districts under National Programme for Prevention and Control of Fluorosis (NPPCF) up to March 2021.	81
2.5.5	State/UT wise Percentage distribution of Households by Availability of Toilet Connectivity within the House in India, Census 2011	82-83
2.5.6	State/UT wise Percentage Distribution of Households by Availability of Type of Drainage, Census 2011	84-85
2.5.7	State / UT wise distribution of Slum Households by the condition of census houses occupied by them, Census 2011	86

## Socio-Economic Indicators

### Highlights

Socio-economic status plays an essential role in the overall health of a person. The inter-relationship between health/ nutrition outcomes with socio-economic indicators is not always linear and at times it is complicated, poorly understood, and potentially fluctuating across cultures. Socio-economic comprises of multi-factorial “conditions” like environmental, material, and personal characteristics that interact elaborately. The “conditions” reinforce each other through self-perpetuating trickledown spirals, not just on an individual level and social layer level, but also at an intergenerational level. In this context, Chapter 2 provides the latest data of the socio-economic indicators, according to State and Union Territory, as these factors influence health/nutrition outcomes through complex pathways of change. The socio-economic factors included in this chapter are literacy & school enrolment, age at effective marriage, economic factors, per capita availability of cereals & pulses, employment rates and household amenities.

### Key Points

#### Education

In 2011, India's overall literacy rate was 73%, with urban areas reporting a 16% higher rate (84%) than rural (68%). Also, there is a 16% gender gap in the overall literacy rate, with males reporting a higher rate (81%) than females (65%). There also exist wide inter-state variations in overall literacy levels. (Table 2.1.1)

With a negligible gender gap, the gross enrolment ratio for both girls and boys in India in primary grades in 2021-22 was near-universal at 104.8% and 102.1%, respectively. However, by the time students reach higher secondary grades, the enrolment ratio drops to 57% and 58.2% for boys and girls respectively. In 29 States/ UTs, 50% or more girls are enrolled in higher secondary grades but enrolment was below 50% in 07 States (Table 2.1.2).

#### Social Indicators

At the national level, the mean age at effective marriage of females remained almost constant at around 22 years from 2018 to 2020 (Table 2.2.1 (a)). The mean age at effective marriage of females in rural India during the same period has marginally improved from 21.8 years in 2018 to 22.2 years in 2020, while in urban areas, it has improved from 21.8 to 23.9 years (Table 2.2.1 (b & c)).

#### Economic Indicators

In 2022-23, Telangana and Karnataka have the highest Per Capita Net Domestic Product. Further among the populous states, Per Capita Net Domestic Product was above INR 150,000 in Andhra Pradesh, Odisha, Punjab, Haryana, Karnataka, Rajasthan, Tamil Nadu, Uttarakhand and Telangana. (Table 2.3.1).

At constant prices during 2011-12 to 2022-23, India registered an increase in GDP from 87 lakh crores to 159.7 lakh crores. Similarly, at constant prices during 2011-12 to 2022-23, India registered an steady increase in Per Capita Net National Income (Table 2.3.2).

#### Housing and Amenities

With wide interstate variations, 32% of Indian households in 2011 have access to safe drinking water as they get it through tap with a treated source and another 12% through the tap from an untreated source (Figure 2.4). Around 34% get drinking water through hand pump, 9% through tube well, and 9% through uncovered well (Table 2.5.2).

As on 01.04.2023, 431 habitations of 46 districts of 7 states were affected by excessive fluoride presence problem in drinking water which was mostly found in the districts of Uttar Pradesh, Rajasthan, and Punjab (Table 2.5.4 (a)).

As on 01.04.2023, 612 habitats of 22 districts of Punjab, Uttar Pradesh and West Bengal had excessive arsenic present in water (Table 2.5.4 (b)).

## 2.1 Education

22	2022(P)	460.8	53.7	514.5

**Source:** Agriculture Statistics at a Glance 2022, Ministry of Agriculture & Farmers Welfare

P- Provisional figures are based on 4th Advance Estimates of Production for 2021-22, Net imports during Apr 2021- Mar 2022 and Stock position as on 23.11.2022

#### Notes:

- i) Net availability of foodgrains is estimated as: Gross Production (-) seed, feed & wastage (-) exports (+) imports (+/-) change in stocks.
- ii) Net availability of foodgrains divided by the population estimates for a particular year indicate per capita availability of foodgrains in terms of kg/year
- iii) Estimates of per capita net availability given above are not strictly representative of actual level of consumption in the country especially as they do not take into account any change in stocks in possession of traders, producers and consumers.
- iv) Foodgrains include rice, wheat, other cereals and all pulses
- v) The per capita net availability of foodgrains is calculated on Financial Year basis from 2022 onwards and is not comparable with the old series which was based on calendar year.

# **CHAPTER THREE**

# **HEALTH STATUS INDICATOR**

**An Overview of Communicable and  
Non Communicable Disease  
Prevalence in India**

## Health Status Indicators

Table No.	Table Name	Page No.
<b>3.1.</b>	<b>Communicable Diseases</b>	
3.1.1	State/UT wise Cases and Deaths due to Malaria in India, 2018-2022	98
3.1.2	State/UT wise clinically suspected Chikungunya Cases in India, 2018-2022	99-100
3.1.3	State/UT wise Cases and Deaths due to Kala-azar in India, 2018-2022	101
3.1.4 (A)	State/UT wise Cases and Deaths due to Acute Encephalitis Syndrome, 2018-2022	102
3.1.4 (B)	State/UT wise Cases and Deaths due to Japanese Encephalitis, 2018-2022	103
3.1.5	State/UT wise Cases and Deaths due to Dengue in India, 2018-2022	104-105
3.1.6 (A)	State/ UT wise Cases and Deaths due to Acute Diarrhoeal Diseases in India, C.Y. 2021 (ICD - 10 Code A09)	106
3.1.6 (B)	State/ UT wise Cases and Deaths due to Acute Diarrhoeal Diseases in India, C.Y. 2022 (P) (ICD - 10 Code A09)	107
3.1.7 (A)	State/ UT wise Cases and Deaths due to Cholera Infection in India, C.Y. 2021 (ICD - 10 Code A00)	108
3.1.7 (B)	State/ UT wise Cases and Deaths due to Cholera Infection in India, C.Y. 2022 (P) (ICD - 10 Code A00)	109
3.1.8 (A)	State/ UT wise Cases and Deaths due to Enteric Fever (Typhoid) Infection in India,C.Y. 2021 (ICD - 10 Code A01)	110
3.1.8 (B)	State/ UT wise Cases and Deaths due to Enteric Fever (Typhoid) Infection in India, C.Y. 2022 (P) (ICD - 10 Code A01)	111
3.1.9 (A)	State/ UT wise Cases and Deaths due to Acute Respiratory Infection in India, C.Y. 2021 (ICD - 10 Code J00-J06, J10, J11 & J20-J22)	112
3.1.9 (B)	State/ UT wise Cases and Deaths due to Acute Respiratory Infection in India, C.Y. 2022 (P) (ICD - 10 Code J00-J06, J10, J11 & J20-J22)	113
3.1.10 (A)	State/ UT wise Cases and Deaths due to Neonatal Tentanus Infection in India, C.Y. 2021 (ICD - 10 Code A33)	114

<b>Table No.</b>	<b>Table Name</b>	<b>Page No.</b>
3.1.10 (B)	State/ UT wise Cases and Deaths due to Neonatal Tetanus Infection in India, C.Y. 2022 (P) (ICD - 10 Code A33)	115
3.1.11 (A)	State/ UT wise Cases and Deaths due to Tetanus Infection in India, C.Y. 2021 (ICD - 10 Code A35)	116
3.1.11 (B)	State/ UT wise Cases and Deaths due to Tetanus Infection in India, C.Y. 2022 (P) (ICD - 10 Code A35)	117
3.1.12 (A)	State/ UT wise Cases and Deaths due to Diphtheria Infection in India, C.Y. 2021 (ICD - 10 Code A36)	118
3.1.12 (B)	State/ UT wise Cases and Deaths due to Diphtheria Infection in India, C.Y. 2022 (P) (ICD - 10 Code A36)	119
3.1.13 (A)	State/ UT wise Cases and Deaths due to Whooping Cough Infection in India, C.Y. 2021 (ICD - 10 Code A37)	120
3.1.13 (B)	State/ UT wise Cases and Deaths due to Whooping Cough Infection in India, C.Y. 2022 (P) (ICD - 10 Code A37)	121
3.1.14 (A)	State/ UT wise Cases and Deaths due to Measles Infection in India, C.Y. 2021 (ICD - 10 Code B05)	122
3.1.14 (B)	State/ UT wise Cases and Deaths due to Measles Infection in India, C.Y. 2022 (P) (ICD - 10 Code B05)	123
3.1.15 (A)	State/ UT wise Cases and Deaths due to Viral Hepatitis (All Causes) in India, C.Y. 2021 (ICD - 10 Code B15-B19)	124
3.1.15 (B)	State/ UT wise Cases and Deaths due to Viral Hepatitis (All Causes) in India, C.Y. 2022 (P) (ICD - 10 Code B15-B19)	125
3.1.16 (A)	State/ UT wise Cases and Deaths due to Rabies Infection in India, C.Y. 2021 (ICD - 10 Code A82)	126
3.1.16 (B)	State/ UT wise Cases and Deaths due to Rabies Infection in India, C.Y. 2022 (P) (ICD - 10 Code A82)	127
3.1.17 (A)	State/ UT wise Cases and Deaths due to Pneumonia Infection in India, C.Y. 2021 (ICD - 10 Code J12-J18)	128
3.1.17 (B)	State/ UT wise Cases and Deaths due to Pneumonia Infection in India, C.Y. 2022 (P) (ICD - 10 Code J12-J18)	129

<b>Table No.</b>	<b>Table Name</b>	<b>Page No.</b>
3.1.18 (A)	State/ UT wise Cases and Deaths due to Meningococcal Meningitis Infection in India, C.Y. 2021 (ICD - 10 Code A39.0 + (G01))	130
3.1.18 (B)	State/ UT wise Cases and Deaths due to Meningococcal Meningitis Infection in India, C.Y. 2022 (P) (ICD - 10 Code A39.0 + (G01))	131
3.1.19 (A)	State/ UT wise Cases and Deaths due to Syphilis in India, C.Y. 2021 (ICD - 10 Code A50-A53)	132
3.1.19 (B)	State/ UT wise Cases and Deaths due to Syphilis in India, C.Y. 2022 (P) (ICD - 10 Code A50-A53)	133
3.1.20 (A)	State/ UT wise Cases and Deaths due to Gonococcal Infection in India, C.Y. 2021 (ICD - 10 Code A54)	134
3.1.20 (B)	State/ UT wise Cases and Deaths due to Gonococcal Infection in India, C.Y. 2022 (P) (ICD - 10 Code A54)	135
3.1.21 (A)	State/ UT wise Cases and Deaths due to Chicken Pox in India, C.Y. 2021 (ICD - 10 Code B01)	136
3.1.21 (B)	State/ UT wise Cases and Deaths due to Chicken Pox in India, C.Y. 2022 (P) (ICD - 10 Code B01)	137
3.1.22 (A)	State/ UT wise Cases and Deaths due to Encephalitis Infection in India, C.Y. 2021 (ICD - 10 Code G04.9)	138
3.1.22 (B)	State/ UT wise Cases and Deaths due to Encephalitis Infection in India, C.Y. 2022 (P) (ICD - 10 Code G04.9)	139
3.1.23 (A)	State/ UT wise Cases and Deaths due to Viral Meningitis Infection in India, C.Y. 2021 (ICD - 10 Code A87)	140
3.1.23 (B)	State/ UT wise Cases and Deaths due to Viral Meningitis Infection in India, C.Y. 2022 (P) (ICD - 10 Code A87)	141
3.1.24	State/UT wise TB notification from public and private sector and treatment outcomes during 2020 and 2021	142-143
3.1.25	State/UT wise observed HIV Prevalence Levels in India among ANC clinic attendees, (HSS 2021) ICD-10 code B20-B24)	144
3.1.26	States/UT wise performance of the Prevention of Parent to Child Transmission of HIV/AIDS (PPTCT) Programme during C.Y. 2022 (ICD-10 B20-B24)	145

<b>Table No.</b>	<b>Table Name</b>	<b>Page No.</b>
3.1.27	State/UT wise cumulative number of People living with HIV/AIDS (PLHIV) alive & on ART till December 2022 (ICD - 10 Code B20 - B24)	146
3.1.28	States/UT wise number of General Individuals (Excluding Pregnant women) Counselled and Tested for HIV and sero-positivity detected during C.Y. 2022 in HIV Counselling and Testing Service Centers (HCTSc) (ICD-10 B20-B24)	147
3.1.29	State/UT wise Leprosy Case Detection, Treatment and Discharge in India, C.Y. 2022	148
3.1.30	State / Disease wise number of Outbreaks reported under Integrated Disease Surveillance Programme (IDSP) during 2022	149
3.1.31	State/UT wise Lab Confirmed Cases & Deaths of Influenza A H1N1 (Swine Flu) from 2018 to 2022 (As on 31.12.2022)	150
<b>3.2.</b>	<b>Non – Communicable Diseases</b>	
3.2.1	State / UT wise cases of Cancer, Diabetes, Cardiovascular Diseases and Stroke (C.Y. 2022) (Out of patients attended NCD Clinics)	151
3.2.2	State/UT wise target and achievement for various eye diseases during 2022-23 (Provisional)	152
3.2.3 (A)	State/ UT wise Cases and Deaths due to Snake Bite in India, C.Y. 2021 (ICD - 10 Code T63.0)	153
3.2.3 (B)	State/ UT wise Cases and Deaths due to Snake Bite in India, C.Y. 2022 (P) (ICD - 10 Code T63.0)	154
3.2.4	State /UT wise number of Districts surveyed under NIDDCP and endemic for Goitre (Thyroid) districts in States/UTs (As per data up to the year 2020-21)	155
3.2.5	Suspected Cases of Dental and Skeletal Fluorosis as reported by States under National Programme for Prevention & Control of Fluorosis (NPPCF) up to 31.03.2020	156
<b>3.3.</b>	<b>Maternal and Child Health</b>	
3.3.1	State / UT wise Maternity Care (for last birth in the 5 years before the survey)	157
3.3.2	State / UT wise Delivery Care (for births in the 5 years before the survey)	158

<b>Table No.</b>	<b>Table Name</b>	<b>Page No.</b>
3.3.3	Current Use of Family Planning Methods (currently married women age 15–49 years)	159
3.3.4	Child Feeding Practices and Nutritional Status of Children	160
3.3.5	Child Vaccinations and Vitamin A Supplementation	161
3.3.6	Unmet Need for Family Planning (currently married women age 15–49 years)	162
3.3.7	Anaemia among Children and Women	163
3.3.8	Targets & Achievement of Maternity and Child Health Activities (Immunisation) in India, 2014-15 to 2022-23 (April - Dec 2022)	164
<b>3.4</b>	<b>Other Causes of Death</b>	
3.4.1	Number of Deaths due to Accidents in India for year, 2012-2021 ICD-10 (Code -S00-99 &T00-40)	165
3.4.2	Number of Accidental Deaths & Suicides in India During 2011 to 2021 (ICD-10 Code-S00-99 &T00-40)	166
3.4.3	Number of accidental deaths, Share & variation of Accidental Deaths by Causes Attributable to Forces of Nature and Other Causes during 2020 & 2021 (ICD-10 Code -S00-99 & T00-40)	167-168
3.4.4 (a)	State/UT wise distribution of Suicidal deaths categorised by Sex & Age group, 2021 (ICD-10 Code -S00-99 & T00-40)	169
3.4.4 (b)	(Contd.) State/UT wise distribution of Suicidal deaths categorised by Sex & Age group, 2021 (ICD-10 Code -S00-99 & T00-40)	170
3.4.5	State/UT wise Cases Registered of Foeticide and Infanticide in India During 2017 - 2021	171-172

**Note:** Since reported data for almost all the diseases is mainly from Government health facilities, results of this chapter may have limitations in terms of its completeness as cases and deaths from private medical & health care institutions are not included. All efforts have been made to capture complete and accurate data in respect of Government health facilities. However, footnotes have been inserted to indicate status of completeness of figures wherever necessary. Hence, findings of this chapter are indicative and not necessarily confirmative of the situation. Figures of Cases and Deaths may not be inclusive of all the districts in respect of Communicable Diseases and Snake Bite.

## Health Status Indicators

### Highlights

Health indicators are measurable characteristics of a population which serve as a tool for describing the health of a population. Health indicators provide comparable and actionable information across different geographic, organizational or administrative boundaries and/or can track progress over time.

Using surveillance data from a cross-section of population (mainly public health facilities) in India, Chapter-3 presents burden of Communicable, HIV/AIDS and Non-communicable diseases (morbidity) and deaths associated to these morbidity (case fatality) - across different States and Union Territories, and India as a whole. This chapter also provides trends and latest State / UT wise status of maternal and child health situation in India . Wherever possible, burden of morbidity, deaths and maternal & child health indicators have been presented for multiple years, that are most recent.

### Communicable Diseases

#### Vector Borne Disease Morbidity

As part of communicable disease surveillance, National Center for Vector Borne Diseases Control, an umbrella programme, provides clinically suspected burden (annual number of cases) of vector borne diseases viz. Malaria, Dengue, Chikungunya, Kala-azar, Acute Encephalitis Syndrome (AES), and Japanese Encephalitis (JE), and associated deaths – as per ICD classification, in India as well as according to states & Union Territories (UT), for multiple years, wherever possible. The surveillance is carried out through three types of sentinel sites (Sentinel Surveillance Sites with laboratory facilities, Sentinel Surveillance Sites without laboratory facilities; other Reporting Units).

In 2022 , the total number of reported cases are highest in Dengue and Malaria across the country .

#### Cases and Deaths due to Vector-borne diseases across India, 2022

Disease	Total Cases	Total Deaths
Malaria	173975	64
Dengue	166718	243
Acute Encephalitis Syndrome	7114	266
Kala-Azar	881	39
Japanese Encephalitis	1022	127

Source: Table No. 3.1.1, 3.1.3, 3.1.4 (A & B ), 3.1.5

#### Other Communicable Diseases

This chapter also provides, cases and deaths due to other communicable diseases like: Cholera, Acute Diarrhoea, EntericFever(Typhoid), Acute Respiratory Infection, Tetanus Neonatal, Tetanus Other than Neonatal, Diphtheria, Whooping Cough, Measles, Viral Hepatitis (All Causes), Rabies, Pneumonia (All Causes), Meningococcal Meningitis, Syphilis, Gonococcal Infection - in India and its States/UTs in 2021 and 2022 by gender, using data from Directorate of Health Services of the State/UT.

## Top 5 Communicable diseases and associated deaths, by gender, 2022

Disease	Male		Female		Total	
	Cases	Deaths	Cases	Deaths	Cases	Deaths
Acute Respiratory Infection	9498940	3602	9893986	1530	19392926	5132
Acute Diarrhoeal Infetion	2949346	650	2649756	356	5599102	1006
Enteric Fever	637629	251	597962	78	1235591	329
Pneumonia	229688	1578	195867	1114	425555	2692
Viral Hepatitis (all cases)	97829	1793	70608	45	168437	1838

Source:- Table No. 3.1.6 (B), 3.1.8 (B), 3.1.9 (B), 3.1.15 (B), 3.1.17 (B)

The data in the above table presents distribution of top five communicable diseases, by sex, in 2022. Respiratory infection with around 95 lakhs caseload in males and 99 lakhs case-load in females is the most common communicable disease in India in 2022. This was followed by Acute Diarrhoeal disease with an annual case load of around 56 lakhs. There were around 12.3 lakh cases of Enteric Fever (Typhoid). Pneumonia with a case load of around 4.2 lakh cases has significantly higher deaths and Viral Hepatitis (All Causes) with a case load of around 1.68 lakhs cases and 1838 deaths.

## Tuberculosis & HIV/AIDS

- Out of entire population covered in India during 2020 to 2021, there is increase in TB patients notified for treatment, confirmed cases and number of patients notified by private sector (Table 3.1.24).
- As per the data of HSS 2021, HIV prevalence level in India is 0.22 among ANC clinic attendees. India has made significant progress in tackling HIV epidemic from a prevalence of 0.40% in 2010-11 to 0.22% by 2020-21. As per the most recent data (2021), Nagaland; (with 1.61%) and Mizoram (with 1.13 %) are high prevalence States and UTs, while states like Arunachal Pradesh and Puducherry recorded zero prevalence rate ( Table 3.1.25).
- In C.Y 2022 , 3.13 crore individuals were counselled and tested for HIV and 0.50% individuals were detected HIV Sero-Positive . Among the states Mizoram had the highest proportion of Individuals detected HIV Positive (3.18%), followed by Arunachal Pradesh (1.7%), Nagaland (1.67%), Meghalaya (1.66%) and Telangana (1.64%) (Table 3.1.28) .
- 16,59,000 People living with HIV/AIDS (PLHIV) alive & on ART till December 2022. (Table 3.1.23). Maharashtra (3,02,168), Andhra Pradesh (2,17,508), Karnataka (1,87,417), Tamil Nadu (1,29,195) and Telangana (1,21,619), had the highest number of PLHIV on ART (Table 3.1.27).
- In 2022, out of total of 2.9 crore pregnant women were tested for HIV, total 7,978 were newly diagnosed HIV Sero-Positive and 7,571 HIV positive pregnant women were initiated on ART. Total 12,283 babies were put on ARV prophylaxis.(Table 3.1.26) .

## Non Communicable Diseases

Non-communicable diseases (NCDs) are medical conditions or diseases that are not caused by infectious agents. These are chronic diseases of long duration, with slow progression and are the result of a combination of genetic, physiological, environmental and behaviours factors. NCDs are one of the major challenges for public health in the 21st century, not only in terms of human suffering but also the harm inflicted on the socioeconomic development of the country. The majority of premature NCD deaths are preventable.

- In the Calander Year 2022, total 9.91 Crore people screened underNational Programme for Prevention & Control of Cancer, Diabates ,Cardiovascular Disease & stroke (NPCDCS). Out of which, around 75 lakhs were diagnosed with Hypertension, 61 lakhs with Diabetes, 29 lakhs with Hypertension and Diabetes, 2 lakhs with CVDs, 1 lakhs with Stroke and 3 lakhs with Common Cancers (Table No. 3.2.1).

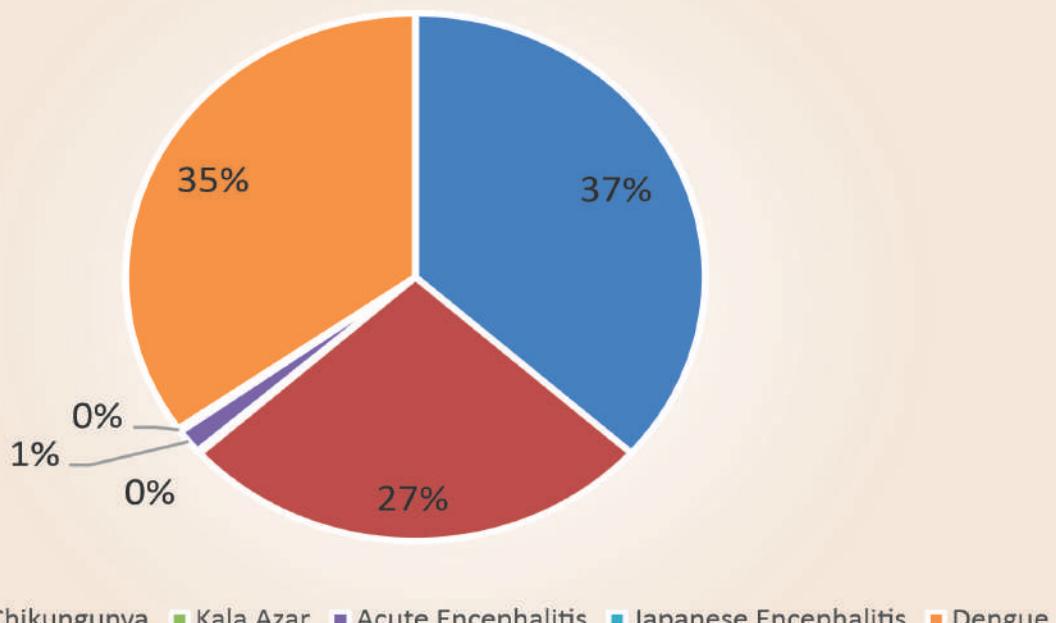

### **Maternal & Child Health**

- Lakshadweep has the highest Number of mothers who had antenatal check up in the first trimester (99.6%). (Table No. 3.3.1)
- Kerala has the highest institutional births (99.8%). (Table No. 3.3.2)
- Meghalaya has the highest Number of Children under age 3 years breastfed within one hour of birth (80.1%). (Table No. 3.3.4)
- In Dadra and Nagar Haveli, 94.9 % children age 12-23 months got fully vaccinated (based on the information from vaccination card). (Table No. 3.3.5)

### **Other Cause of Death**

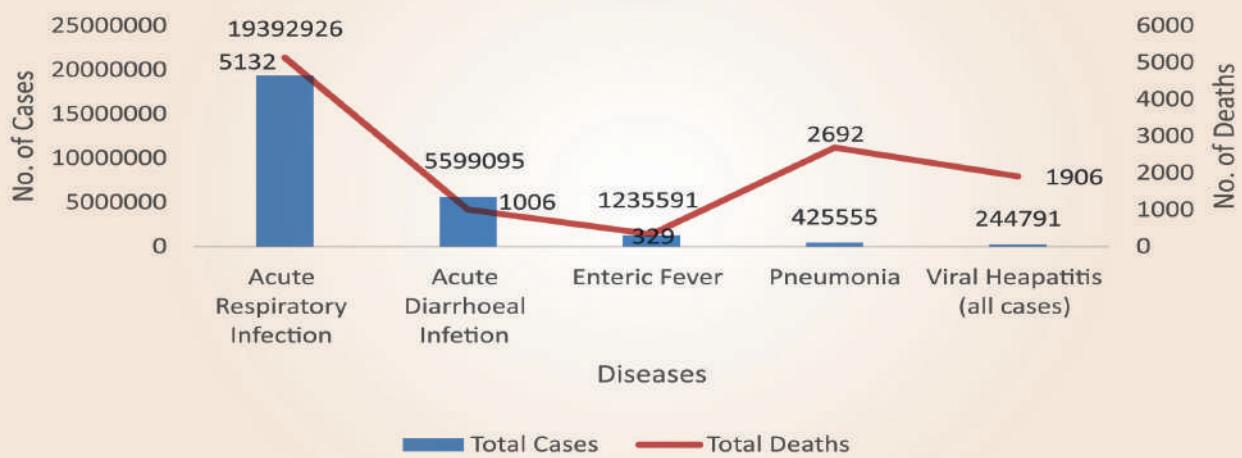

- Total number of Suicides cases recorded in 2021 were 1,64,033. Maximum numbers of Suicide Cases in Males (40,415) are reported betweenthe age group 30- 45 Years and in case of Females (18,588) maximum number of Suicide Cases reported between the age group 18-30 years (Table No. 3.4.4(a,b)).
- In 2022, a total of 525 died due to Snake bite while the same was 600 in 2021 (Table No. 3.2.3 (A) & (B)).
- Road Traffic Accidents are one of the significant factors responsible for high number of death toll. Traffic accidental deaths reported in 2020 and 2021 are 3,74,397 and 3,97,530 respectively (Table No. 3.4.3).

\* Treatment success rate for microbiologically confirmed patients diagnosed in 2020 and 2021 are assigned in the successive years.

Note:

- 1) "Total patients notified for treatment" is given in place of the term Total patients registered for treatment. Total patients include patients both from the public and private sector.
- 2) Microbiologically confirmed is the new nomenclature which includes erstwhile smear positive patients.
- 3) The data source is Ni-kshay. Date of data extraction is March 1, 2023.

Source: National Family Health Survey 2019-20 (NFHS-5), Ministry of Health & Family Welfare

Notes: #:for pregnant women the value is <11.0 (g/dl). Haemoglobin in grams per decilitre (g/dl).

@: Among children, prevalence is adjusted for altitude.

Among adults, prevalence is adjusted for altitude and for smoking status, if known.

As NFHS uses the capillary blood for estimation of anaemia, the results of NFHS-5 need not be compared with other surveys using venous blood.

( ) Based on 25-49 unweighted cases;

\* Percentage not shown; based on fewer than 25 unweighted case.

## Health Finance Indicators

Table No.	Table Name	Page No.
4.1.1	Trends in broad Health Financing & Macroeconomics Indicators	179
4.1.2	Key Health Expenditure Indicators for India from National Health Accounts	180
4.1.3	Key Health Financing Indicators for India as percentage of Current Health Expenditure	180
4.1.4	Key Health Financing Indicators for India	181
4.1.5	Key Health Finance Indicators for select States	182
4.1.6	State / UT (with Legislature) wise Govt. Health Finance indicators (2019-20)	183
4.1.7	Govt. Health Finance indicators for all the UTs without legislature (2019-20)	184
4.2.1	Approved Outlay from 2007- 2024 in Central Sector for Ministry of Health & Family Welfare	185
4.2.2	Actual Expenditure from 2007- 2023 in Central Sector for Ministry of Health & Family Welfare	186
4.2.3	Scheme wise Statement of Health Expenditure for 2020-21, 2021-22, 2022-23(BE, AE) and 2023-24 (BE)	187-191
4.2.4	Scheme wise Approved Outlay BE, RE and Expenditure for National Health Mission for Annual Plan 2020-21, 2021-22, 2022-23 (BE,AE) and 2023-24 (BE)	192-193
4.2.5	Scheme Wise Plan Outlay and Expenditure for AYUSH during 2020-21,2021-22 and 2022-23 (BE & AE) and 2023-24 (BE)	194-196
4.2.6	Scheme wise Plan Outlay and Expenditure for Department of Health Research during 2020-21, 2021-22, 2022-23 (BE & AE)and 2023-24(BE)	197
4.2.7	Scheme-wise Approved Outlay and Expenditure of NACO during 2021-22, 2022-23 (BE & AE) and 2023-24(BE)	198
4.3	Per capita expenditure on Central Government Health Scheme	199
4.4	Coverage of beneficiaries of Employees State Insurance Corporation as on 31-03-2022	200
4.5	Trends in coverage, income and expenditure on Employees State Insurance Corporation	201
4.6	Key Performance Indicators related to Ayushman Bharat Pradhan Mantri Jan Aarogya Yojna (AB PM-JAY) as on 01.05.2023	202
4.7	Health Insurance (Excluding Travel – Domestic / Overseas and Personal Accident) Policies, Gross Premium and Number of Persons Covered, FY 2021-22	202

## **Health Finance Indicators**

Health Financing is increasingly being recognized as an area of major policy relevance to achieve Universal Health Coverage (UHC). It deals with generation, allocation and use of financial resources in health system. The understanding of Health Financing system allows to recognize current finances available for health, ways to raise more funds for health, mechanisms to efficiently and equitably allocate to improve access to health services and reduce out of pocket expenditures that lead to catastrophe and impoverishment.

Health financing refers to the mechanisms and strategies used to generate and allocate funds for healthcare services, ensuring that individuals and communities have access to necessary medical care. It involves the collection, pooling, and allocation of financial resources to promote sustainable healthcare systems

Appropriate Health Financing is a means to ensure adequate funds for health care, provide equitable access to all population groups and reduce barriers to utilize health services. This chapter provides detailed information on – (i) Public Expenditure on Health; (ii) Medical Expenditure.

For the year 2019-20, Total Health Expenditure (THE) for India is Rs. 6,55,822 crores (3.27% of GDP and Rs. 4,863 per capita). THE constitutes current and capital expenditures incurred by Government and Private Sources including External/Donor funds. Current Health Expenditure (CHE) is Rs. 5,93,659 crores (90.52% of THE) and capital expenditures is Rs. 62,163 crores (9.48% of THE). (Table 4.1.1 to 4.1.7)

Total Public expenditure on health (estimated) for the year 2023-24 is Rs. 95719 crore including Health (Rs. 38828 crores and NACO Rs. 2917 crore), NHM (47347 crore), AYUSH (3648 crore) and Department of Health Research (2980 crore) (Table 4.2.1)

Total Public expenditure on health (actual) for the year 2022-23 is Rs. 79893 crore including Health (Rs. 32716 crores and NACO Rs. 1998 crore), NHM (40662 crore), AYUSH (2065 crore) and Department of Health Research (2452 crore) (Table 4.2.2)

The per capita expenditure on CGHS has increased from Rs. 4,050 to Rs 15260 during the period from 2010-11 to 2022-23 (Table 4.3)

The per capita expenditure on ESIS has increased from Rs. 254 to Rs 908 from 2009 to 2022. As of 31<sup>st</sup> March 2022, around 12.04 crores of beneficiaries were covered under ESIS. (Table 4.4 & 4.5)

In summary, health financing is a multidimensional concept that encompasses the mobilization, pooling, and allocation of financial resources to support healthcare systems. It involves a combination of public and private funding mechanisms, the establishment of health insurance schemes, the reduction of out-of-pocket payments, strategic purchasing, resource allocation, and effective governance. By implementing sound health financing strategies, countries can work towards achieving universal health coverage and improving the accessibility, affordability, and quality of healthcare services for all.

### **Defining Healthcare Expenditures Boundaries for India**

System of Health Accounts 2011 framework (SHA 2011) sets the boundary for health expenditures. There is time, spatial and functional boundaries.

Health expenditures incurred for consumption of health care goods and services during a given fiscal year (for India) are included. Health expenditures made by residents of the country and those incurred by Indian residents who live abroad temporarily or who travel abroad to seek treatment are included. Health care goods and services consumed by foreign nationals in India are considered out of the boundary of health accounts.

Under the functional dimension, expenditures on all activities are included whose primary purpose is to restore, improve, maintain, and prevent the deterioration of health status of the population and mitigating the consequences of ill-health through the application of qualified health knowledge - medical, paramedical, and nursing knowledge, including technology and traditional, complementary and alternative medicine

(TCAM). While the basis for the inclusion of health expenditures is based on the above-mentioned activities, there is a distinction between current and capital expenditures. Current health expenditures include activities for the current consumption of services to promote, develop and maintain health status and are included in the boundary of NHA

Medicines / Ancillary services that are purchased/ availed independently without prescription from a health professional like self-prescriptions/self-diagnosis which involves over-the-counter medicines are also included as health expenditures.

Certain health-related activities are provided by various Government departments other than the Department of Health and Family Welfare. These activities include the provision of long-term social care, enhancing integration of disabled persons, enforcement of standards of food hygiene, provision of drinking water, environmental protection, sanitation, and other multi-sector promotion of healthy lifestyles. Though these activities have a health-enhancing component in them, the primary purpose of implementing these programs is either for the provision of social services or to improve the overall status of the population and hence these expenditures are excluded from the boundary of NHA. However, care should be taken while excluding these expenditures. For instance, if a department allocates money to provide targeted supplementary nutrition to prevent anemia, then it should be within the boundary, whereas a supplementary nutrition program whose aim is to provide nutrition education and counselling should be excluded from the boundary of NHA.

The NHA estimates for India do not include the following activities:

Compensation/ benefits for wage loss, for the failure of sterilization, maternity benefits (salaries of staff on maternity leave), loss of household income due to sickness, disablement, and death due to employment injury to workers and dependents.

Expenditures related to purification, testing, and supply of potable water, sanitation services, cremation and animal care, disposal of wastes, nutrition programs like mid-day meal, any other programs that complement but directly do not impact health.

Other miscellaneous expenditures incurred by the relatives or friends who accompany the patient like transport costs, food expenditures, lodging charges, and loss of wages / labor.

Interest paid on revenues, dividends, reserves of the insurer (after claims are paid including administrative overheads) are not accounted for.

### **Healthcare Expenditure**

Out of Pocket Expenditure on Outpatient and Inpatient (Medicines, doctor fees, bed charges, diagnostic, Preventive & Rehabilitative services, Traditional Systems of Medicine (AYUSH), ambulance and allied services, Health Enhancing Drugs/products (such as vitamins with/without Prescription) at Public/Private health facilities and pharmacies.

All Government Health Expenditure (Budgets to health facilities, procurement of drugs and consumables, health programs Disease Control, Family Welfare & Reproductive Child Health Programme, National Nutrition Mission (only health component), Immunization, Antenatal Care, Delivery, Postnatal Care, Abortion etc.).

Health Administration, Health Insurance, Medical benefits to employees by government/private entities/ not-for-profit institutions serving households and enterprises.

### **Outside SHA Boundary**

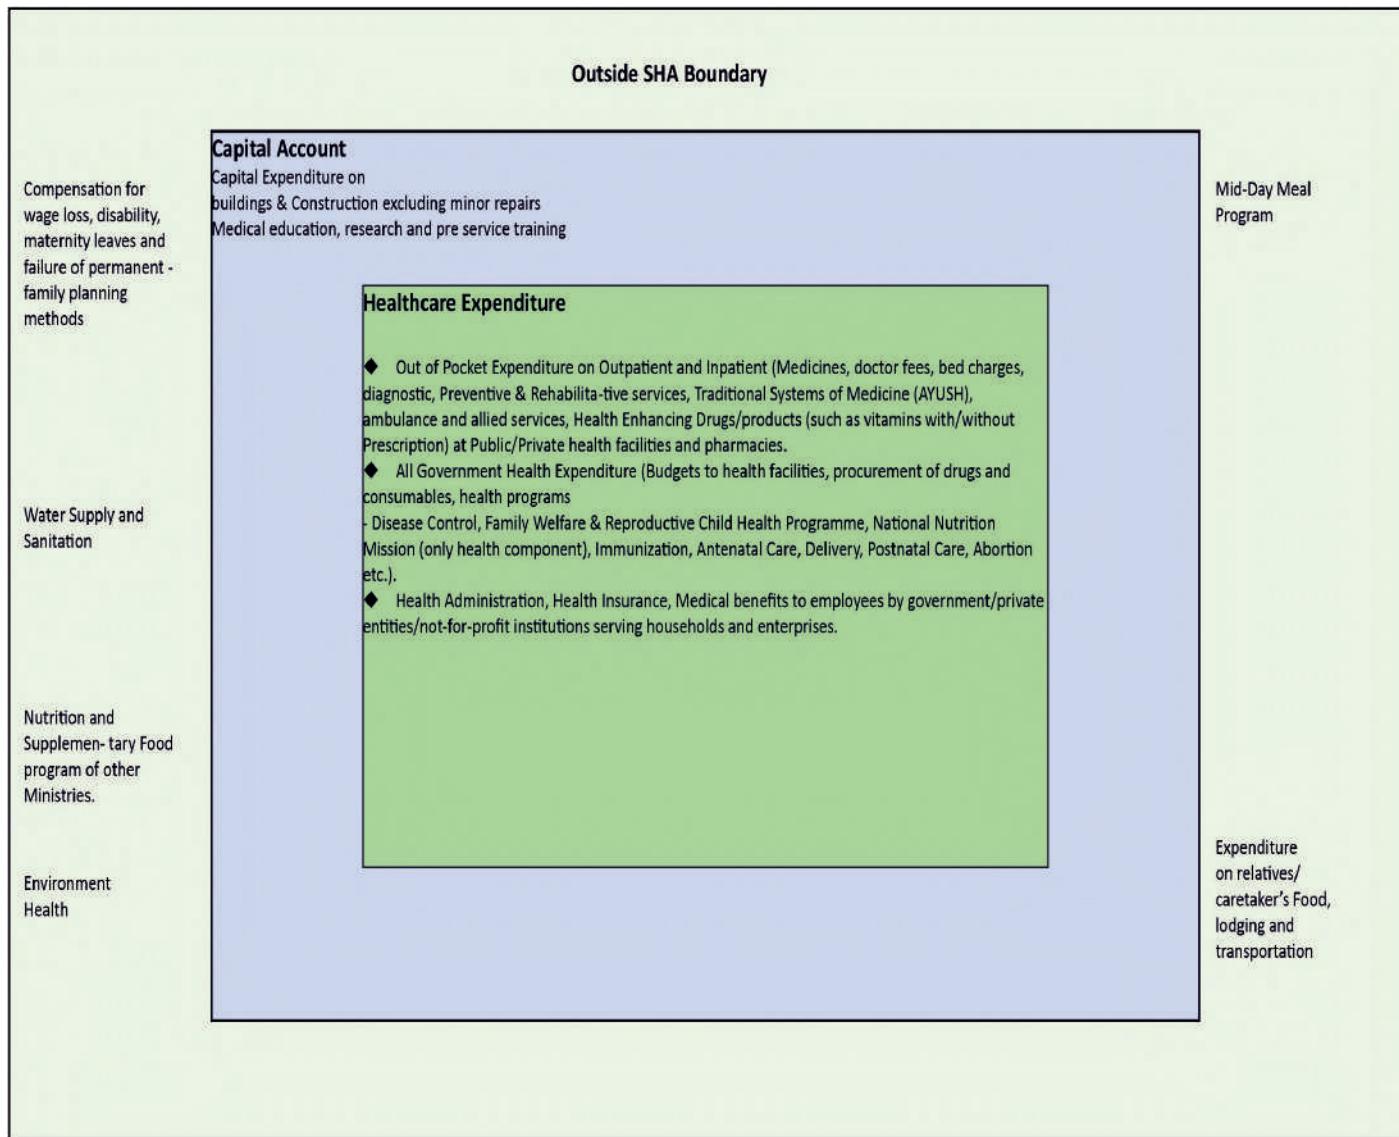

- Compensation for wage loss, disability, maternity leaves and failure of permanent-family planning methods
- Mid-Day Meal Program
- Water Supply and Sanitation

- Nutrition and Supplementary Food program of other Ministries.
- Environment Health
- Expenditure on relatives/ caretaker's Food, lodging and transportation

### **Capital Account**

Capital Expenditure on buildings & Construction excluding minor repairs Medical education, research and pre service training

Key health financing indicators enable comparison of health expenditures with other countries and across various rounds of National Health Accounts estimates within the country. Health financing indicators commonly used, and the relevant description is presented here.

#### 4.1.1: Trends in broad Health Financing & Macroeconomics Indicators

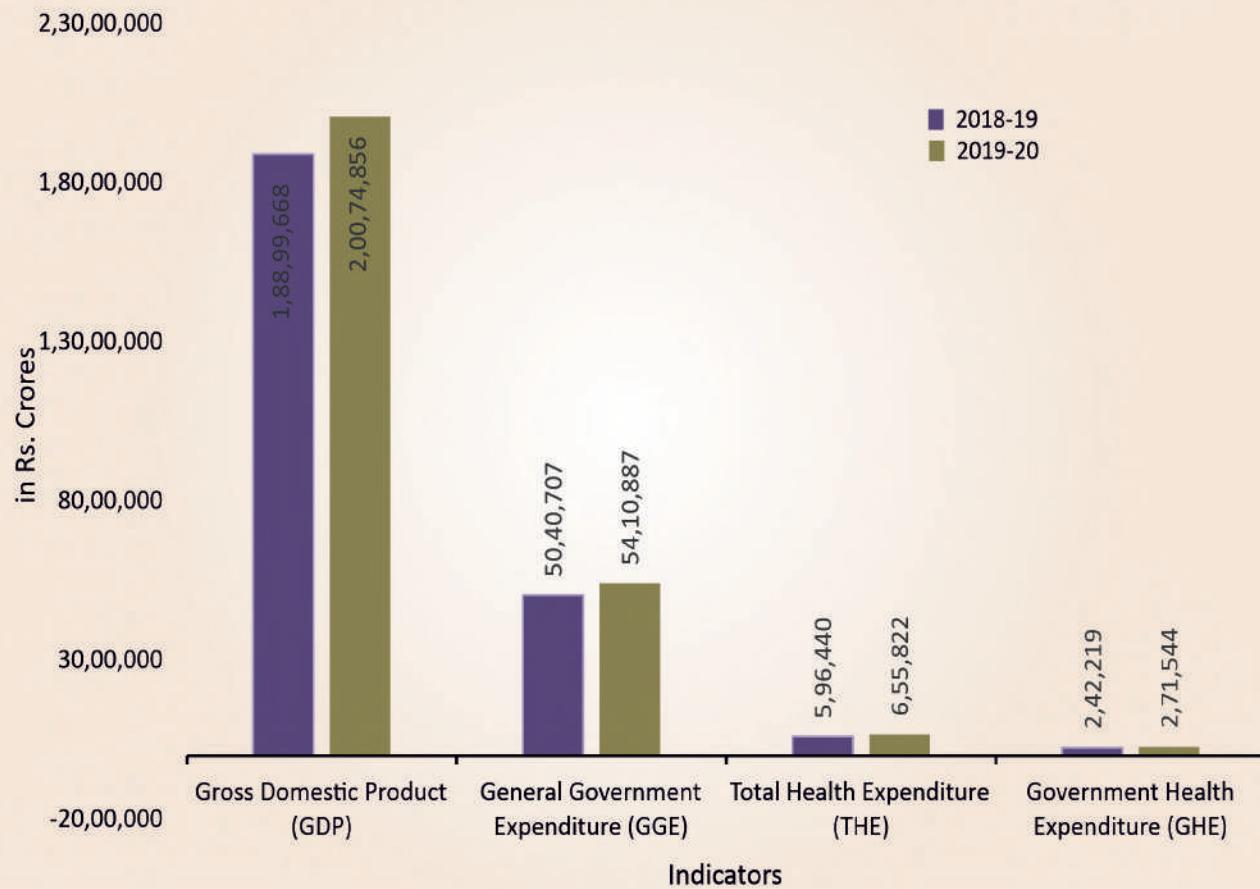

S. No.	Indicators	2018-19	2019-20	Percentage Change
(Rs. in crores)

**Source:** National Health Estimates,2019-20, Ministry of Health & Family Welfare

Gross State Domestic Product (GSDP): GSDP at current prices is sourced from Directorate of Economics & Statistics of respective State Governments, and for All-India -- Central Statistics Office which presents estimates with base year 2011-12.

General Government Expenditure (GGE): State wise GGE is sourced from RBI State Finances: a Study of budgets (2021); appendix II: revenue expenditure of States and union Territories with legislature and appendix Capital expenditure of States and Union Territories with legislature accessed on 28.01.2023

Total Health Expenditure (THE) of a State/ UT includes health expenditure by all government agencies (Union/State/Local Bodies) including quasi-governmental organizations and donors in case funds are channelled through government organizations), all household health expenditures, all expenditures by Enterprises, Not for Profit Institutions Serving Households (NPISH/ NGO) and external donors. Government Health Expenditure (GHE) of a State/ UT includes health expenditure by all government agencies (Union/State (including State Other Departments)/Local Bodies) including quasi-governmental organizations and donors in case funds are channelled through government organizations. Out of Pocket Expenditure (OPE) are expenditures directly made by households at the point of receiving health care.

For a particular State, Per capita value for THE is arrived by dividing total health expenditure by the population for respective state, Per capita value for OPE is arrived by dividing total OPE by the population for respective state. All values in this table are rounded off.

#### 4.1.7: Govt. Health Finance indicators for all the UTs without legislature (2019-20)

S. No.	Union Territory*	Per capita GHE**	GHE (in Rs '000)	Population ('000)
1	Andaman & Nicobar Islands	8,813	35,16,487	399
2	Dadar & Nagar Haveli and Daman & Diu	2,426	24,69,841	1,018
3	Chandigarh	4,862	58,00,789	1,193
4	Lakshadweep	12,647	8,59,990	68

**Source:** National Health Estimates,2019-20, Ministry of Health & Family Welfare

\* The GSDP and GGE figures for the UTs without legislature are not available.

\*\* For a particular UT, Per capita value for GHE is arrived by dividing total government health expenditure by the population for respective UT.

Government Health Expenditure (GHE) of a state/ UT includes health expenditure by all government agencies (Union/States (including State Other Departments)/Local Bodies) including quasi-governmental organizations and donors in case funds are channeled through government organizations.

Gross State Domestic Product (GSDP): GSDP at current prices is sourced from Directorate of Economics & Statistics of respective State Governments, and for All-India — Central Statistics Office which presents estimates with base year 2011-12.

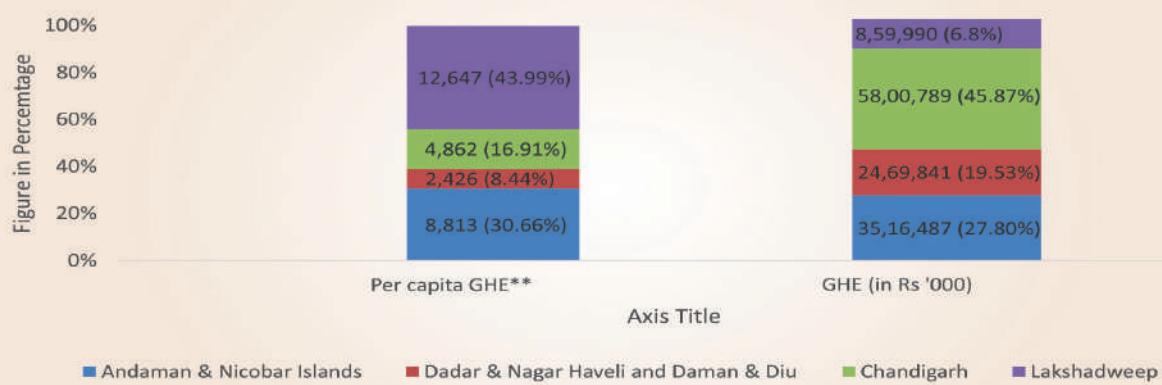

General Government Expenditure (GGE): State wise GGE is sourced from RBI State Finances: a Study of budgets (2021); appendix II: revenue expenditure of States and union Territories with legislature and appendix IV: Capital expenditure of States and union Territories with legislature accessed on 28.01.2023

For a particular State, Per capita value for GHE is arrived by dividing total government health expenditure by the population for respective state.

Government Health Expenditure (GHE) of a state/ UT includes health expenditure by all government agencies (Union/State (including State Other Departments)/Local Bodies) including quasi-governmental organizations and donors in case funds are channeled through government organizations.

All values in this table are rounded off.

# **CHAPTER FIVE**

# **HUMAN RESOURCES FOR HEALTH**

**An Overview of Trained and  
Specialized Medical, Nursing and  
Paramedical Personnel in the country**

## Human Resources for Health

Table No.	Table Name	Page No.
5.1	State/UT wise Number of MBBS Doctors Registered With State Medical Councils/National Medical Commission up to 31.12.2022	207
5.2	State/UT wise Dental surgeons Registered under Central / State Dental Councils of India up to 31.12.2022	208
5.3	State/UT wise Number of Government Allopathic Doctors and Dental Surgeons as on 31.12.2022	209
5.4	State/UT wise AYUSH Registered Practitioners (Doctors) as on 01.01.2021	210-211
5.5	State/UT wise Number of Registered Nurses as on 31.12.2022	212
5.6	State/UT Wise Number of Registered Pharmacists as on 01.03.2023	213
5.7(a)	State/UT wise Number of Health Manpower in Rural Areas (Govt.) in Sub Centres and Primary Health Centres as on 31.03.2022	214-215
5.7(b)	State/UT wise Number of Health Manpower in Rural Areas (Govt.) in Community Health Centres as on 31.03.2022	216-217
5.7( c )	State/ UT wise Number of Health Manpower in Urban Areas (Govt.) in Primary Health Centres as on 31.03. 2022	218
5.7(d)	State / UT wise Number of Health Manpower in Urban Areas (Govt.) in Community Health Centres as on 31.03. 2022	219
5.7 (e )	State / UT wise Number of Doctors and Paramedical Staff at District Hospital and Sub- District / Sub- Divisional Hospital as on 31.03.2022	220
5.8	Number of Health Manpower in Railways as on 31.12.2022	221
5.9	Number of Health Manpower in ESI Corporation as on 31.03.2022	222

## **Human Resources for Health**

Human Resources for Health (HRH) are regarded as one of the core building blocks of the health system, which inter - alia include physicians, nursing professionals, pharmacists, midwives, dentists, allied health professionals, community health workers, social health workers etc. Human Resources for Health (HRH) also include other health care providers, as well as health management and support personnel - those who may not deliver services directly but are essential for effective health system functioning along with health services managers, medical records and health information technicians, health economists, health supply chain managers, medical secretaries etc.

Focus areas in HRH include planning, development, performance, management, retention, information, and research on human resources for the health care sector. In recent years menace of Pandemic has increased awareness of the critical role of HRH in strengthening health system performance and population health outcomes.

Mandate for Universal Health Coverage depends to a great extent on adequate and effective HRH providing primary, secondary and tertiary level of care in both private and public sectors. The size and composition of HRH in India has significantly improved during the last decades. The recent health sector reforms in India, particularly since the launch of the National Rural Health Mission, have laid emphasis on strengthening HRH in the public sector system.

In the Indian context health workforce information systems had limitations of reliable and timely data that is integral to effective policy making. HRH data in India is managed by several stakeholders including states and the National Health Mission.

In last few years several steps have been taken by departments as well as different regulatory bodies to strengthen data, although a lot more strengthening of systems is the need of the hour. Availability of real time authentic data helps in ensuring evidence based informed decision making and effective policy development at all levels. The HRH data comes from the following sources:

- a) Registration data of professional bodies;
- b) Health manpower data from Different Service Sectors; and
- c) Rural Health Statistics.

### **Key Points**

#### **Professional Councils in India**

Among the states, Maharashtra has the highest number of registered doctors (2,11,046) followed by Tamil Nadu (1,49,397), Karnataka (1,34,448), & Andhra Pradesh (1,05,804) and total registered doctors in India is 1349679 as on 31.12.2022 (Table 5.1) . For registered dental surgeons, Maharashtra has the highest number (46,243) followed by Karnataka (43,872), Tamil Nadu (27,771) and Kerala (27,644) and total registered dental Surgeons in India stands at 2,94,102 for the year 2022-23 (Table 5.2).

There are total 10,004,34 ANM, total 25,56,416 Registered Nurses & Registered Midwives(RN & RM) and 57,167 Lady Health Visitors (LHV) serving in the country as on 31.12.2022 (Table no. 5.5) . There are 17,13,730 Registered Pharmacists as on 01-03-23 as per the Pharmacy Council of India ( Table No.5.6). At Present, in India there are 1,51,064 seats available for various types of medical courses. Among the number of seats as per different courses, MBBS (1,04,163) has the highest number of seats across all the States/UT, followed by MD. /MS. courses (42,100) (Table 5.7)

## 5.1 : State/UT wise Number of MBBS Doctors Registered with State Medical Councils/ National Medical Commission upto 31.12.2022

6.2.12	Vaccine & Institution wise Annual Installed Capacity from 01.01.2022 to 31.12.2022	280

## Health Infrastructure

### Highlights

Public health infrastructure has been referred to as 'the nerve center of the public health system'. Health infrastructure provides the capacity to prevent disease, promote health, and prepare for and respond to both acute (emergency) threats and chronic (ongoing) challenges of health to the communities, states, and nation. Health infrastructure is an important indicator for understanding the health care delivery provisions and welfare mechanisms in a country. This is the basic support for the delivery of public health activities and signifies the investments and priority accorded to create the infrastructure in public and private sectors.

To understand the Health Infrastructure indicators, the section can be subdivided into two categories:

#### (a) Education Infrastructure:

Educational infrastructure provides details of medical colleges, students admitted to M.B.B.S. course, post graduate degree/diploma in medical and dental colleges, admissions to BDS & MDS courses, AYUSH Institutes, Nursing and Pharmacy courses. Statutory regulatory councils have been established to monitor the standards of medical education, promote medical training and research activities, and oversee the qualifications, registration, and professional conduct of doctors, dentists, nurses, pharmacists, and practitioners of other systems of Medicine such as Ayurveda, Yoga, Unani, Siddha and Homoeopathy.

Important among these laws are: The Indian Medical Council Act, 1956; the Indian Nursing Council Act, 1947; the Indian Medicine Central Council Act, 1970; the Homoeopathy Central Council Act, 1973; and the Pharmacy Act, 1948. Almost all of these laws establish councils that set forth uniform educational and qualification standards. Regulations for Medical professionals already exist under National Medical Council (Erstwhile Medical Council of India), Code of Medical Ethics, 2002 and are accessible on the respective websites.

Medical Education infrastructure has shown rapid growth over past few years with 679 medical colleges (380 Government; 299 Private), and 1,04,163 MBBS seats as on 30.06.2023 (Table No. 6.1.1 and 6.1.1 (a) and (b))

There are 10,233 DNB (Diplomat of National Board) seats available across the country (Table No. 6.1.2)

At present there are 318 dental colleges out of which 277 colleges have MDS seats (Table 6.1.4). Also, there are 789 AYUSH Colleges/ Institutes and 63,477 admission capacity across (Table 6.1.5(a)).

Currently there are 10,137 Institutions for ANM with 50,388 seats for admission (Table 6.1.6).

#### (b) Service Infrastructure:

As on 31st March 2023, there are total of 1,61,829 Sub Centers (SCs) (1,57,935 rural + 3894 urban), 31,053 Primary Health Centers (PHCs) (24935 rural + 6118 urban), 6064 Community Health Centers (CHCs) (5,480 rural + 584 urban), 1,275 Sub-divisional Hospitals, 767 District Hospitals (Table 6.2.1 & 6.2.1(a))

979 Special Newborn Care Units (SNCU) have been set up in Districts and Medical Colleges, 3139 Newborn Stabilization Units (NBSUs) at level of FRUs and 21,483 New born Care Corners (NBCCs) at delivery points operationalized as per continuum of care strategy and 972 Nutritional Rehabilitation Centers functional as on 31.12.2022(Table 6.2.3).

There are 3844 hospitals and 36848 dispensaries to provide Medical care facilities under AYUSH by management as on 1.4.2021. (Table 6.2.6 (a)).

There are total of 3,917 blood banks (1,242 Govt. and 2670 Pvt. including Charitable Trust as on 31.01.2023 (Table 6.2.7)

As on 31.12.2022, there are 336 Allopathic Wellness Centres, 18 Polyclinic and 97 AYUSH Units and 8,87,000 Primary Card holders registered under Central Government Health Scheme( CGHS) (Table 6.2.8 & 6.2.9)

Total no. of Eye Banks is 378 (122 Govt. and 256 Private) as on 31.12.2023 (Table 6.2.11).

## **(A) Brief on Central Bureau of Health Intelligence (CBHI)**

Central Bureau of Health Intelligence (CBHI) was established in 1961 with the vision to have a strong Health Management Information System in entire country. The mission of CBHI is “To strengthen Health Information system in each of the district in the country up to facility level for evidence based decision making in the Health Sector”

CBHI is one of the division of Directorate General of Health Services in the Ministry which is headed by a HAG / SAG level medical officer with specialization in public health administration of Central Health Services (CHS) and supported by officers from Indian Statistical Services as well as CHS through its 6 Field Survey Units (Bengaluru, Bhopal, Bhubaneshwar, Jaipur, Lucknow and Patna) and 5 Training Centres (Medical Record Department at Safdarjung Hospital, Dr RML Hospital, New Delhi, JIPMER Puducherry & RIMS, Ranchi and RHSTC, Mohali).

### **1. Objective of CBHI**

- a. To collect, analyze & disseminate Health Sector related data of the country for evidence-based policy decisions, planning and research activities;
- b. To develop Human resource for scientifically maintaining medical records & use of family of International Classification Diseases in India;
- c. To carry out need based research for efficient implementation of Health Information System & Implementation of Family of International Classifications in India;
- d. To collaborate with National & International Institutes for imparting knowledge & skill development.

### **2. Organization**

- a. The CBHI under the aegis of DGHS, Government of India is headed by DDG & Director and has three Divisions viz. (i) Policy, Training & Coordination, (ii) Information & Evaluation, and (iii) Administration.
- b. It has six Field Survey Units (FSUs) under the supervision of respective Regional Directors from Regional Office of Health & Family Welfare, GOI located at Bengaluru, Bhopal, Bhubaneswar, Jaipur, Lucknow and Patna; each headed by a Deputy Director of Indian Statistical Service with technical & support staff from Subordinate Statistical Service and allied services. Also, five training centers located at (i) Regional Health Statistics Training Centre, Mohali, Punjab, (ii) Medical Record Department & Training Centre, Safdarjung Hospital, New Delhi, (iii) Medical Record Department and Training Centre, JIPMER, Puducherry, (iv) Medical Record Department & Training Centre, Dr. RML Hospital, New Delhi and (v) Medical Record Department & Training Centre, RIMS, Ranchi.
- c. Various long term and short term training courses are being conducted through these six FSUs and five training centers.

### **3. Major Activities of CBHI**

3.1 CBHI is responsible for collecting primary as well as secondary data from various Government Organizations/ Departments, maintaining and disseminating Heath Sector information through its annual publication “National Health Profile” highlighting most of the relevant health and health related information under 6 major themes viz. Demographic, Socio-economic, Health Status, Health Finance, Health Infrastructure and Human Resources in Health.

3.2 CBHI conducts long term and short term trainings and sensitization Workshops for the officers and the Para-medicals working in Health institutions of India for capacity building and human resources development in health sector,

**3.2.1 Long Term Trainings:** Medical records are an essential component of medical care. For scientific maintenance of Medical Records in Health Institutions following long term Training Programmes are conducted by the CBHI to strengthen and develop human resources & health information system of the country.

S. No	Name of Training	Batch	Duration	Training Centre (TC)
1	Medical Record officer	2 batches (1 batch at each training center)	1 Year	MRD & TC at: 1. Safdarjung Hospital, New Delhi 2. JIPMER, Puducherry
2	Medical Record Technician	8 batches (2 batches at each training center)	6 Months	MRD & TC at: 1. Safdarjung Hospital, New Delhi 2. JIPMER, Puducherry 3. Dr. R M L Hospital, New Delhi 4. RIMS, Ranchi

(Note: Training Calendar, Eligibility, Guidelines and Application Forms for all the above courses are available on CBHI Official website [www.cbhidgbs.nic.in](http://www.cbhidgbs.nic.in) )

**3.2.2 The Short Training:** Short Term Training are conducted for efficient heath system management through Six (06) FSUs and RHSTC, Mohali.

S.No	Name of training	Batch/ year	Training Duration	Training Centre
1	Training Course on Master Trainers On ICD-10	2	3 days	RHSTC Mohali
2	Training Course on Master Trainers On ICF	2	3 days	RHSTC Mohali
3	Orientation training course on Health Information Management (For Officers)	8	5 days	RHSTC Mohali & 6 FSUs
4	Orientation training course on Health Information Management (For Para-medical personnel)	14	5 days	RHSTC Mohali & 6 FSUs
5	Orientation training course on Family of International classification (ICD-10 & ICF) (For Non-Medical Personnel)	20	5 days	RHSTC Mohali & 6 FSUs
6	Orientation training course on Medical Record & Information Management System (MRIM)	8	5 days	RHSTC Mohali & 6 FSUs

CBHI conducts 54 batches of Training Courses every year on regular basis.

**3.2.3 Total of 30 Sensitization workshops** in various medical colleges and hospitals.

## F. Definitions of various Terms used in NHP-2023

**Accidental Deaths:** The total number of deaths caused by an accident or by causes attributable to forces of nature per 1,00,000 population during the reference year in a given country, territory, or geographical area.

**Ante Natal Care (ANC):** It is a systemic supervision of a woman during pregnancy at regular intervals to monitor maternal wellbeing, fetal wellbeing and progress of fetal growth. Minimum ante natal cares include at least three ante natal check-ups, TT immunization and IFA supplement.

**Annual Exponential Growth Rate:** Annual population growth rate for year t is the exponential rate of growth of mid-year population from year t-1 to t, expressed as a percentage. Population is based on the de facto definition of population, which counts all residents regardless of legal status or citizenship.

**Annual GDP Growth Rate:** The annual rate of change of the gross domestic product (GDP) at market prices based on constant local currency, for a given national economy, during a specified period of time. It expresses the difference between GDP values from one period to the next as a proportion of the GDP from the earlier period, usually multiplied by 100.

**Birth Rate:** The number of live births per 1000 estimated midyear population, in a given year.

**Calorie:** A calorie is a unit of measurement for energy. In most fields, it has been replaced by the joule, the SI unit of energy. However, it is used for the amount of energy obtained from food.

**Case Fatality Rate:** The Total number of deaths as proportion of repeated cause of a specific disease at a specific time.

**Communicable diseases:** An illness due to a specific infectious agent or its toxic products capable of being directly or indirectly transmitted from man to man, animal to animal or from the environment ( through air, dust, soil, water, food etc.) to man or animal.

**Contraceptive Methods:** Preventive methods that help women to avoid unwanted pregnancies which include all temporary and permanent measures to prevent pregnancy resulting from coitus.

**Crude Birth Rate:** The crude birth rate (CBR) is defined as the number of live births in a year per 1,000 population estimated at midyear.

**Crude Death Rate:** The crude death rate (CDR) is defined as the number of deaths in a year per 1,000 population estimated at midyear.

**Decadal Growth Rate:** It is defined as the percentage of total population growth in a particular decade.

**Dentists Ratio:** The average number of dentists available per every 10,000 inhabitants in a population, at a given year, for a given country, territory, or geographic area

**Density of Population:** Number of persons, living per square kilometer.

**Dependency Ratio:** The average number of economically dependent population (population under 15 years of age plus 65 years of age and over) per 100 economically productive population (between 15 and 64 years of age) for a given country, territory, or geographic area, at a specific point in time.

**Fertility:** Ability to conceive & bear children during a woman's reproductive period.

**Fertility Rate:** The number of live births during a year per 1000 female population aged 15-49 years at the midpoint of the same year.

**Foeticide:** Induced termination of a pregnancy with destruction of the foetus or embryo.

**Gross Domestic Product:** The gross domestic product (GDP) at market prices is the sum of gross value added by all resident producers in the economy plus any taxes and minus any subsidies that are not included in the valuation of output. GDP measures the total output of goods and services for final use occurring within the domestic territory of a given country, regardless of the allocation to domestic and foreign claims; it provides an aggregate measure of production.

**Gross National Product (GNP):** The sum of gross value added by all resident producers, plus any taxes (less subsidies) that are not included in the valuation of output, plus net receipts of primary income (employee compensation and property income) from non-resident sources, divided by the mid-year population.

**Habitation:** A group of families living in proximity to each other, within a village. It could have either heterogeneous or homogenous demographic pattern. There can be more than one habitation in a village but not vice versa.

**Health Expenditure:** Health expenditure covers the provision of preventive and curative health services, public health affairs and services, health applied research, and medical supply and delivery systems, but it does not include provision of water and sanitation.

**HIV Sentinel Surveillance:** Provides essential information to understand the trends and dynamics of HIV epidemic among different risk groups in the country

**House:** A building / structure / dwelling that people use and usually one family live in.

**Household:** A group of persons normally living together and taking food from a common kitchen. The members of a household may or may not be related by blood to one another.

**Infanticide:** Act of deliberately causing the death of a very young child (under one year old).

**Infant Mortality Rate (IMR):** is defined as the number of infant deaths in a year per 1,000 live births during that year.

**Life Expectancy at Birth:** The average number of years that a newborn could expect to live, if he or she were to pass through life exposed to the age and sex-specific death rates prevailing at the time of his or her birth, for a specific year, in a given country, territory, or geographic area.

**Low Birth Weight:** Birth weight less than 2500 grams (up to and including 2499 grams).

**Malnutrition:** Malnutrition is a general term for the medical condition in a person caused by an unbalanced diet—either too little or too much food, or a diet missing one or more important nutrients.

**Maternal & Child Health:** The term maternal & child health refers to the promotive, preventive, curative & rehabilitative health care for mother & children which includes the sub areas of maternal health, child health, family planning and health aspects of care of children.

**Maternal Mortality Ratio (MMR):** A maternal death is the death of a woman while pregnant or within 42 days of termination of pregnancy, from any cause related to or aggravated by the pregnancy or its management, but not from accidental or incidental causes.

**Mortality Rate from Communicable Diseases:** Total number of deaths from communicable diseases in a population of a given sex divided by the corresponding total number of this population, after removing the effect of differences in the age distribution, expressed per 100,000 population for a given year, in a given country, territory, or geographic area.

**Mortality Rate from Non-Communicable Diseases:** Total number of deaths from non-communicable diseases in a population of a given sex divided by the corresponding total number of this population, after removing the effect of differences in the age distribution, expressed per 100,000 population for a given year, in a given country, territory, or geographic area.

**Non-Communicable Diseases:** Diseases that are not translated from an infected person to another by any means & mostly caused by factors like improper lifestyle & eating habits.

**Old Age Dependency Ratio:** The proportion of persons above 65 years of age are considered to be dependent on the economically productive age group (15-64 years)

**One-year-olds Immunized Against Measles:** Percentage of one-year-olds who have received at least one dose of measles-containing vaccine in a given year. For countries recommending the first dose of measles among children older than 12 months of age, the indicator is calculated as the proportion of children aged less than 24 months receiving one dose of measles-containing vaccine.

**Percentage covered with Safe Water:** The percentage of the population that has safe drinking water available in the home or with reasonable access.

**Percentage covered with Sanitation:** The percentage of the population that has adequate excreta-disposal facilities available.

**Percentage of Contraceptive Users:** Percentage of eligible couples effectively protected against child birth by one or the other approved methods of family planning, viz sterilization, IUD (intra-uterine devices), condom or oral pills.

**Percentage of Infants Immunized:** The percentage of infants reaching their first birthday that have been immunized against each of the six EPI - target diseases (Diphtheria, Pertussis, tetanus, polio, measles and tuberculosis). The denominator used in the calculation is the number of infants surviving to age one.

**Pre-Natal Mortality Rate:** Pre-Natal Mortality Rate includes late foetal deaths (28 weeks gestation & more) and early neonatal deaths (first week) in one year per 1000 live births in the same year.

**Physicians Ratio:** The average number of physicians available per every 10,000 inhabitants in a population, at a given year, for a given country, territory, or geographic area.

**Population:** Number of inhabitants of a given sex and/or age group that actually live within the border limits of the country, territory, or geographic area at a specific point of time, usually mid- year. The midyear population refers to actual population at July 1st.

**Proportion of Urban Population:** The percentage of total population of a country, territory, or geographic area living in places defined as urban, at a specific point of time, usually mid-year.

**Post-Natal Mortality Rate:** Number of deaths of Children between 28 days and one year of age in a given year per 1000 total live births in the same year.

**Prevalence:** The number of events, e.g., instances of a given disease or other condition, in a given population at a designated time; sometimes used to mean "prevalence rate":

**Prevalence Rate (ratio):** The total number of all individuals who have an attribute or disease at a particular time (or during a particular period) divided by the population at risk of having the attribute or disease at this point in time or midway through the period.

**Primary Health Care:** Essential health care that is technically valid, economically feasible and socially acceptable. Primary health care includes eight essential elements: Health Education, Safe water & Basic sanitation, Maternal & Child health care, Family planning, Immunization against the major infectious diseases, Prevention & control of locally Endemic diseases, Provision of Essential Drugs and appropriate treatment of common diseases and injuries.

**Professional Nurses Ratio:** The average number of certified nurses available per every 10,000 inhabitants in a population, at a given year, for a given country, territory, or geographic area. Certified nurse does not include auxiliary and unlicensed personnel.

**Proportion of Deliveries attended by Trained Personnel:** The number of deliveries assisted by trained personnel in a specific year, regardless of their site of occurrence, expressed as a percentage of the total number of births in that same year, in a given country, territory, or geographic area. Trained personnel include medical doctors, certified nurses and midwives; not included are traditional birth attendants, trained or not.

**Public Health Expenditures:** All expenditures for the provision of Health Services, Family Planning activities and Emergency Aid designated for health (Excluding provision of Drinking water and Sanitation).

**Still Birth Rate:** Death of a foetus weighing 1000g (equivalent to 28 weeks of gestation) or more, during one year in every 1000 total births.

**Total Fertility Rate:** Number of children that would be born per woman, assuming no female mortality at child bearing age and the age-specific fertility rates of a specified country and reference period.

**Unmet need of Planning:** Unmet need for family planning refers to fecund women who are not using contraception but who wish to postpone the next birth (spacing) or stop child bearing altogether (limiting).

**Urban:** The term urban refers to towns (places with municipal corporation, municipal area committee, notified area committee or cantonment board); also, all places having 1000 or more inhabitants, a density of not less than 1000 persons per sq. mile or 390 per sq. km.

**Proportion of Rural Population:** The percentage of total population of a country, territory, or geographic area living in places defined as rural, at a specific point of time, usually mid-year. The term rural refers essentially to villages and other rarely populated areas.

**(G) : Important Days / Weeks / Months of Public Health Awareness (G) : Important Days / Weeks / Months of Public Health Awareness**

<b>Month</b>	<b>Day</b>	<b>Observed As</b>
January	1	Global Family Day
	4	World Braille Day
	12	National Youth Day
	24	National Girl Child Day
	30	World Neglected Tropical Disease Day
	Last Sunday of January	World Leprosy Day
	01-31	Cervical Cancer Awareness Month
February	4	World Cancer Day
	6	International Day of Zero Tolerance of Female Genital Mutilation
	10	National Deworming Day
	11	World Unani Day
	12	Sexual Reproductive Health Awareness Day
	13	International Condom Day
	Second Monday of February	World Epilepsy Day
March	4	World Obesity Day
	8	International Women's Day
	10	National Kidney Day (India)
	12	Glaucoma Day
	12 to 18	World Glaucoma Week
	16	National Immunization Day/Vaccination Day
	20	World Oral Health Day
	21	World Down Syndrome Day / World Forestry Day
	24	World TB Day
	Second Wednesday of March	No Smoking Day
April	Second Thursday of March	World Kidney Day
	2	World Autism Awareness Day
	7	World Health Day
	11	World Parkinson's Day
	17	World Haemophilia Day
	19	World Liver Day
	22	Earth Day
	25	World Malaria Day
	28	World Day for Safety and Health at Work
	22 - 29	World Primary Immunodeficiency Week
Last Week of April (24 – 30)		World Immunization Week

	01-30	Irritable Bowel Syndrome (IBS) Awareness Month, Stress Awareness Month, International Caesarean Awareness Month
May	1	International Labour Day
	5	World Hand Hygiene Day
	6	International No Diet Day
	8	World Red Cross Day
	12	World Chronic Fatigue Syndrome Awareness Day / International Nurses Day
	15	International Kangaroo Care Awareness Day
	16	National Dengue Day
	17	World Hypertension Day
	18	World Aids Vaccine Day
	19	World Family Doctor Day
	22	World Preeclampsia Day
	25	World Thyroid Day
	28	International Day of Action for Women's Health / International Women's Health Day
	29	World Digestive Health Day
	30	World Multiple Sclerosis Day
	31	Anti – Tobacco Day / World No Tobacco Day
	First Tuesday of May	World Asthma Day / World Thalassemia Day / World Ovarian Cancer Day
	Second Sunday of May	International Mother's Day (Related to Health / Nutrition of Mother's)
June	5	World Environment Day
	8	World Brain Tumor Day
	14	World Blood Donation Day
	15	World Elder Abuse Awareness Day
	18	Autistic Pride Day
	19	World Sickle Cell Day
	21	International Yoga Day
	26	International Day against Drug Abuse and Illicit Trafficking
	12 - 18	International Man's Health Week
July	1	National Doctors Day
	11	World Population Day
	28	World Hepatitis Day / World Liver Day
	29	ORS Day
August	1 to 7	World Breast Feeding Week
	13	World Organ Donation Day
	19	World Humanitarian Day

	25 August to 8 September	National Eye Donation Fortnight
September	1 to 7	National Nutrition Week
	10	World Suicide Prevention Day
	17	World Marrow Donor Day and World Patient Safety Day
	21	World Alzheimer's Day
	25	World Pharmacist Day
	28	World Rabies Day
	29	World Heart Day
	Every Last Sunday	World Day of the Deaf
October	1	International Day for the Elderly / World Vegetarian Day
	2	No Alcohol Day
	6	World Cerebral Palsy Day
	10	World Mental Health Day
	12	World Arthritis Day
	13	World Thrombosis Day
	15	Global Hand Washing Day
	16	World Food Day
	17	World Trauma Day
	20	World Osteoporosis Day
	21	World Iodine Deficiency Day
	24	World Polio Day
	29	World Stroke Day
	Entire October	Breast Cancer Awareness Month
	Second Thursday of October	World Sight Day
November	3	One Health Day
	10	World Immunization Day
	12	World Pneumonia Day
	14	World Diabetes Day
	17	World Prematurity Day and National Epilepsy Day
	19	World Toilet Day
	18 – 24	World Antibiotic Awareness Week
	15 – 21	Newborn Care Week
	1 - 30	Pancreatic Cancer Awareness Month / Lung Cancer Awareness Month
	Every Third Wednesday	World COPD Day
December	1	World AIDS Day
	2	National Pollution Prevention Day
	3	International Day of persons with disabilities
	12	International Universal Health Coverage Day
	1 - 31	Constipation Awareness Month

## National Health Profile of India

The National Health Profile of India (NHP) is an initiative at par with international standards of data publications. The objective of this publication is to create a versatile database of health information of India which is comprehensive, up-to-date and easily accessible to all stakeholders in the healthcare sector. NHP provides recent trends in demography, disease profile (communicable and non communicable/lifestyle diseases) and available health resources that define a country's health status. Following the standard coding from Family of International classification (FIC) in presenting the diseases profile will improve interoperability of the data internationally. NHP provides relevant information to the planners, policy makers, health administrators, research workers and others engaged healthcare sector to take informed decisions. This publication will also be useful for medical post graduates and trainees of medical and paramedical personnel and will contribute further to the improvement of quality of health services and equitable distribution of health resources in the country.

The research team for NHP assessed a large number of websites and publications dealing with management of health data relevant to health status of a nation and adopted a modified structure of six – indicators - Demographic, Socio-Economic, Health Status, Health Finance, Human Resources in Health Sector and Health Infrastructure in order to organize and manage the health information of India. This structure was discussed in great detail (with a range of people from senior health policy makers, administrators to epidemiologists and anthropologists) to assess its robustness to handle data now and afterwards and the need to include or exclude data from the existing publications. Identifying the most appropriate data sources for the selected indicators is an on-going research. Eventually we present the most updated data identified from various sources and are illustrated in the new format of tables with various combinations of parameters such as age, sex, urban, rural etc.

NHP can contribute towards providing better universal and equitable healthcare to its people as envisaged in National Health Policy 2017 as it helps in informed decision making on policies and initiatives of various stakeholders in healthcare sector. Nevertheless, we recognize the need for continuous improvement of this publication to match the ever changing health needs of people and the paradigm shifts in program implementation to achieve higher levels of effectiveness. We envision that this structure of data organization will undergo further standardization and enhancement of the database.
